Corebreakers Campaign Rules

V0.0.63

Glossary

General Terminology

- **Player/Players**- The individuals participating in the campaign.
- **Enemy/Enemies**- Other players units.
- **Destroyed**- Any Coreborn or building whose structure has been reduced to 0 or any Coreborn that has had its Core destroyed.
- **Infantry** - a catchall term for **Trooper (TRP)** and/or **Veteran (VET)** units.
- **Trooper (TRP)** - most units start as Troopers. Troopers are cheap and expendable.
- **Veteran (VET)** - **Troopers** may be promoted to Veterans. Veterans are much harder to kill and roll injuries on being taken out of action.
- **Killed** - any **Infantry** with the designation **Trooper (TRP)** is killed (cannot be recovered) when reduced to 0 HP during a mission.
- **Out of Action (OOA)** - any **Veteran (VET)** taken off the board from reaching 0 HP. Veterans are not killed upon reaching 0 HP, just taken off the board and then roll for **Injury**.
- **Injured** - any **Veteran (VET)** that is reduced to 0 HP and taken off the board in a mission must roll (after the mission) on the injury chart. If they gain an injury they are considered injured. Refer to the "Infantry Injury" section of this rulebook.
- **Retreated**- Any unit that makes it off the table on their spawn side in retreat will count as Destroyed/Killed/Out of Action for the sake of payment and mission objectives but is not considered Destroyed/Killed/Out of Action for the purposes of injury and repairs. A unit may not retreat until Turn 3, unless the Primary Objective has already been completed by either player. Coreborn may not retreat until their structure is reduced by half (rounded up) or they have half their core breaches dealt (rounded up) or normal retreat conditions apply.
- **VP (Victory Points)** - Points that add to determine winner of a game/campaign
- **SP (Skill Points)** - Points that are gained after missions to use on gaining skills for infantry.

Campaign Rules

- **Players will need 2 six (6) sided dice, 1 twelve (12) sided die and 1 twenty (20) sided die to play a campaign**
- Each player will progress through **7 missions**, advancing one mission at a time.
- Each mission is randomly chosen using a **1d6** die.
    - Missions 1, 4, and 7 are predetermined. Missions 2, 3, 5, and 6 are randomly selected using the appropriate 1d6 Mission Types Table.
- Each subsequent mission increases the maximum Creds a player can spend and the maximum number of units they can field.
- Completing a mission's Primary Objective grants both Victory Points (VP) and Creds.
- Completing a Secondary or Tertiary Objective grants a smaller amount of VP and Creds.
    - **Cred rewards stack** (e.g., completing both Primary and Secondary grants full rewards from both).
    - **VP rewards do not stack**—players only gain the higher of the two (Primary or Secondary/Tertiary).
- Each player is assigned an **Extra Objective** before each mission. Completing these yields additional VP as well as SP.
- At the end of the 7 missions, the player with the most VP wins.

Doctrine Selection

- Before creating an army, each player must choose a Doctrine to run their army by.

Doctrine Name	Doctrine Benefit	Doctrine Drawback
Capitalist Doctrine	Gain +120 creds after mission 1	All infantry cost +5 creds to purchase
Coalition Doctrine	The first Breach repair **or** Structure repair on each Coreborn is free after each mission.	Each Sabotage or Tempo costs +10 creds
Disruptor Doctrine	Sabotage and Tempo costs are reduced by 10 creds. You may reroll the Sabotage and Tempo roll once per purchase	All Coreborn weapons cost +5 creds to purchase.
Medical Doctrine	The first time an infantry would gain a Major Injury, instead give it a Minor Injury. This applies to each infantry.	Increase the cost of all Injury recoveries by 5 creds
Industrial Doctrine	Reduce cost of Coreborn Upgrades and Weapon Upgrades by: • 5 Creds if cost is 10–20 • 10 Creds if cost is 21–30	If a Coreborn has at least 2 upgrades of any kind (coreborn, weapon or otherwise) it will cost 5 creds to deploy
Command Doctrine	+1 VP if completed both primary and secondary objectives	-1 VP if failed primary objective
Cybernetics Doctrine	Do not lower the dice tier for installing cyborg augmentations if installing a **second** augment	If a Cyborg Augmentation fails, the infantry must sit out the next mission in addition to failure effects.
Recovery Doctrine	If you lose a mission, gain 20 creds. **Does not apply to Surrenders.**	No Effect
Salvagers Doctrine	Gain +1 die tier to salvage rolls. On a successful salvage roll gain 25 creds.	All friendly Coreborn repairs cost +5 creds
Smugglers Doctrine	Gain 2 rerolls to black market rolls. The last roll stands.	A failed black market discovery roll results in a loss of 50 creds.
Veterans Doctrine	May recruit one VET before mission 1 and use them on mission 1. Start the campaign with 1 more SP in the pool	Always lose initiative on the first turn of the first 3 missions of a campaign.

Army and Detachment Creation

Initial Army Creation (Before Mission One)

- Before the first mission is selected, each player builds their Army using the Corebreakers: Machina Infantry Cards section of the Core Rules.
- For the first mission, Army construction follows these restrictions:
    - **Maximum Army Cost: 200 Creds**
    - **Maximum Units: 8**
        - Players may field fewer than 8 units.
    - **VET units may not be purchased or fielded before the first mission. Unless veterans doctrine is chosen.**
    - Coreborn may not be purchased. They may only be acquired through specific mission rewards or stolen from opponents.
    - Players may choose to spend fewer than 200 Creds.
    - Any unspent Creds are added to the player's general Cred pool and may be used normally after the mission.
- After Armies are created, each player selects a Detachment from their Army to deploy for the mission.

Army vs. Detachment

- **Army** refers to all units a player has purchased during the campaign.
- **Detachment** refers to the units selected from the Army to participate in a specific mission.

Reserve

- Any purchased unit not selected for a mission Detachment is considered to be in Reserve.
    - Reserve units remain part of the player's Army.
    - Infantry in Reserve may be selected freely when forming future Detachments.
    - Units in Reserve retain all skills, injuries, and campaign effects.

Campaign Army Restrictions

- Each unit type in “Corebreakers: Machina” has a limit in the total number a player can have in their army:
    - Coreborn: 4
    - Rifleman: 4
    - Corebuster: 3
    - Runner: 3
    - Vanguard: 3
    - Saboteur: 2
    - Expeller: 2
    - Operator: 2
    - Sniper: 2
    - Drone Controller: 2
    - Shade: 1
    - Commander: 1
    - Outrider: 1

Purchasing Units

- **Coreborn may never be purchased.**
- Any infantry may be purchased at the price indicated on their stat card between missions.
- Coreborn weapons, defenses and upgrades may be purchased and placed onto existing Coreborn owned by a player.

Obtaining a Coreborn

- Coreborn may only be found on the “Coreborn Recovery” mission type.
- All Coreborn begin as a frame.
- After obtaining a Coreborn, the player with the Coreborn frame will give it Attributes and Specializations.
    - These will determine its Classification as per the “Coreborn Construction Rules”.
- Coreborn retain this attribute and specialization **permanently**.

Equipping Weapons, Defenses and Upgrades to Coreborn

- Any Coreborn may unequip its Core, ranged weapon(s), melee weapon(s), defense and weapon upgrade(s) and put them into a pool where any other owned Coreborn able may take the item and equip them.
    - All restrictions still apply when reequiping.
- If a Coreborn has no Core, it cannot function.
- A Coreborn cannot be deployed without a ranged weapon.
- A Coreborn cannot be deployed without a melee weapon.

Attributes and Specializations

- Attributes and Specializations cannot be unequipped, they are locked to the Coreborn.

Choosing an Attribute and Specialization

- After collecting a Coreborn frame from the battlefield, the player who owns the new Coreborn must determine its attributes and specializations.
- These stay with the coreborn forever and can never be changed.

Campaign Mission Completion Reward

- After a battle is completed, each player receives 10 Creds as a participation reward. A player who surrenders does not receive this reward. The opposing player still receives their participation reward.

Selling Units

- **Coreborn frames may not be sold.**
    - Any coreborn cores, weapons, upgrades, defenses and weapon upgrades may be sold for half of their price rounded up
        - The light laser and fists sells for 0 creds despite having a purchase price.
- Any non injured infantry (Trooper or Veteran) may be sold for **half price rounded up.**
- **Untreated Injured Veterans cannot be sold until they are given medical treatment.**
    - Minorly injured and psychologically injured infantry may be sold for a quarter of their price rounded up.
    - Majorly injured Infantry are sold for 0 Creds.

Repairing Coreborn

- **Any destroyed Coreborn cannot be repaired and are instead salvaged.**
    - See "Salvaging Coreborn" for rules.
- Structure Damage and Breaches taken during a battle will carry over into the next battle unless repaired. Only the Coreborns owner can pay for repair costs.

Repair	Cost
1 Point of Structure	15 Creds
1 Breach	25 Creds
Any Shields	None

- **Players may field Coreborn that are damaged.**

Stealing Coreborn

- A big part of “Corebreakers” is stealing Coreborn.
- Any player who is in control of a Coreborn at the end of a mission will have that Coreborn placed into their army.
- If a player controls a Coreborn and retreats off the board, it is considered to be captured and owned by that player.
- When a Coreborn is stolen, it retains all weapons, defenses and other upgrades.

Salvaging Coreborn Parts

- If a Coreborn is destroyed in a mission, parts can still be found amongst the rubble.
- For each core, weapon, defense, upgrade and weapon upgrade on the destroyed Coreborn each player rolls a 1 x Tier 3 (Yellow) dice, the player that rolls better wins.
    - Crit>Hit>Miss
- **If both players roll a miss, that loot is destroyed and cannot be recovered.**
- Each time a player wins a roll, add +1 tier dice to the loser player's roll for the next piece of loot.
    - This can accumulate per each loss.
    - After the player that lost the roll wins another roll, the advantage resets

Black Market

- A player may make **three Black Market discovery attempts total**, regardless of whether they succeed.
- After any mission, a player may **choose to** roll 1 x Tier 4 (Purple) to attempt to find the Black Market,
    - On Hit: Find the Black Market
    - On Crit: Find the Black Market and gain 1 reroll for the charts on the black market.
    - On Miss: Do not find the Black Market
- If a player finds the black market, the player chooses one of three charts below to roll **1d6** on to see what the black market is selling
- Any time that a player does not find the black market, increase their dice tier to find the Black Market by 1 for the next time they attempt to find it.
    - This can stack.
- **After Mission 7, skip Steps 5–9. The campaign ends after final rewards are tallied.**

Coreborn and Cyborg Gear Deals		
Roll	**Name**	**Effect**
1	**Mugged**	Choose one upgrade or weapon **worth 20+ creds** and lose it. If none apply, lose your highest-cost weapon or upgrade. If none apply again, lose 20 creds.
2	**Overstock**	The player receives 25% off their next Coreborn weapon purchase. All other players receive 10% off their next Coreborn weapon purchase. **Discounts do not stack.**
3-4	**Rapid Deployment**	When placing Call-In markers, place yours 2” closer to your spawn
5	**Cyborg Discount**	The next Cyborg Augmentation Purchase comes with a 50% discount and reduces missions sat out for it by 1.
6	**Cyborg Harmony**	The next Cyborg Augmentation will always succeed.

Intel Deals		
Roll	**Name**	**Effect**
1	**Bad Intel**	The opponent wins first initiative on the next mission.
2	**Scouted Data**	On the next mission, all players gain +1 VP if completed Primary objective.
3-4	**Movement Knowledge**	Choose 1 enemy infantry at the start of **one** of the turns of a mission. The opposing player must move that unit first.
5	**Insider Knowledge**	Choose one already used initiative card, use it again in the mission.
6	**UAV Above**	Automatically win one chosen initiative on the next mission. Each player does not discard.

Economy Deals		
Roll	**Name**	**Effect**
1	**Sting Operation**	Lose 25 creds to a minimum of 0.
2	**Market Shift**	Gain 30 creds all opponents gain 10 creds
3-4	**Small Job**	Gain 25 Creds
5	**Jackpot**	Gain 50 Creds
6	**Special Operation**	Gain “Smuggle Cargo” Extra Objective in addition to the regular extra objective for the next mission only.

Smuggle Cargo		
Name	**Objective**	**Creds**
Smuggle Cargo	Designate one infantry in your army, that infantry is considered to be carrying smuggled cargo, ending a turn on the opponents board edge will deliver the cargo. If that infantry is killed, fail this objective. You do not need to tell your opponent that you have the smuggle cargo mission.	80

Tempo/Sabotage

- Before a mission begins, a player may choose to do an tempo or a sabotage action
    - Cannot do both
- A player must spend **35 creds** to roll on a Tempo or Sabotage Chart.
- Choose one of the two charts below and roll a **1d6** to determine the affect

Tempo		
Roll	**Name**	**Effect**
1	**Slow Start**	None of your units may sprint on turn 1
2	**Redundant Radios**	Once during the mission, after Initiative cards are revealed, you may force both players to redraw their Initiative cards. Both players must use the new result. Do not discard the old cards.
3-4	**Early Deployment**	Increase your deployment range by 3”. If the mission is Breach the Fortress and you're on defense, instead give all friendly infantry +1 dodge for the first turn.
5	**Infiltrator**	1 infantry without forward spawn may gain the forward spawn keyword for the next mission.
6	**Coreborn Escort**	Spawn a Coreborn into your deployment zone. It may be piloted but moves half distance and has -1 Ranged, Artillery and Melee accuracy for the first turn.

Sabotage		
Roll	**Name**	**Effect**
1	**Backfire**	The opponent automatically wins the first initiative on the next mission.
2	**Pre-Placed Mines**	Before Deployment, choose 2 spots on the map, place a 1” mine token on each, this has the same stats as a Saboteur Mine.
3-4	**Empty Mag**	Choose 1 enemy infantry, it cannot fire on turn 1
5	**Debt Collectors**	Choose 1 enemy infantry, it cannot sprint for the whole mission
6	**System Lock**	If the opponent's Initiative card is 2 or more higher than yours, you win the Initiative.

Missions

- Corebreakers: Machina has 14 mission types.
- The 1st, and 4th missions will be “Coreborn Recovery” and are always that mission.
- The 7th mission is always “Total War”.
- For all missions that are not “Coreborn Recovery” or “Total War”, roll on the Mission Types Table on the next page to determine what mission is played.

Mission, Maximum Army Value , and Unit Max

Mission #	Maximum Army Value	Infantry Max	Deployed Coreborn Max
1	200	8	0
2	250	9	1
3	300	10	1
4	350	11	2
5	400	12	2
6	450	13	2
7	500	14	3

Mission Types

Roll 1d6 and refer to the appropriate chart below to determine the mission played
Refer to "Corebreakers: Machina Mission Types" for rules for each type of mission

Missions 2 and 3	
Roll	**Mission**
1	Kill Confirmed
2	Resource Extraction
3	Aeonite Vault
4	Capture the Data Cache
5	Downed Goods
6	Power Surge

Missions 5 and 6	
Roll	**Mission**
1	Bunker Busters
2	Towers Fall
3	Breach the Fortress
4	Headhunter
5	Mark the Target
6	Locate and Extract the VIP

Mission Victory Points and Pay

Primary Objectives

- Completing a Primary Objective will reward that player with a payout and VP score based on what mission number it is in the 7 mission campaign.

Secondary and Tertiary Objectives

- Completing secondary objectives provides **additional** payout of 50% if the primary is already completed.
- If a secondary objective or tertiary objective is the only one completed, the player will still be rewarded with 75% of the payment of the contract.
- On the off chance that a secondary and tertiary objectives are completed but the Primary is failed, the mission payout is as if the Primary was completed (100%)

Extra Objectives

- Extra Objective VP is separate from mission-objective VP.

Failure Consequences

- Failing to complete any objectives results in a 50% payout.

Victory Points for Completing Objectives

Mission Number	VP for Completing Primary Objective only	VP for completing Secondary/Tertiary objective only
1	2	1
2	2	1
3	2	1
4	3	2
5	3	2
6	3	2
7	4	3

Mission Pay

Contract Pay (Creds)				
Mission #	Primary Completed	Secondary/ Tertiary Completed (this will be added to the primary completion)	Secondary/ Tertiary **ONLY** Completed	Primary and Secondary/ Tertiary Failed
1	**180**	**80**	**130**	**80**
2	**205**	**90**	**150**	**90**
3	**225**	**100**	**170**	**100**
4	**250**	**110**	**190**	**110**
5	**270**	**120**	**210**	**120**
6	**305**	**130**	**230**	**130**
7	**325**	**140**	**250**	**140**

Extra Objectives

- These are called Extra Objectives because they are to be extra optional objectives on top of the missions.
- **Before the first mission**, each player is randomly assigned **One** **Easy Extra Objective** from the Easy Extra Objectives table.
- If a player completes their extra objective during a mission, they earn **Victory Points (VP)** and **Skill Points (SP)** for their army.
- Then the player receives a new extra objective before the next mission.
    - 1 VP for easy Extra Objectives
    - 2 VP for moderate Extra Objectives
    - 4 VP for hard Extra Objectives
- If a player does not complete their extra objective, they may **reroll** on the same table to draw a different objective before the next mission.
- **The player cannot roll an extra objective they have already completed.**
- After completing **2** **Easy Extra Objectives**, the player begins drawing objectives from the **Moderate Extra Objectives** table.
- After completing **3** **Moderate Extra Objectives**, the player begins drawing from the **Hard Extra Objectives** table for the remainder of the campaign

Rerolling Extra Objectives

- Players may spend 50 creds to reroll their assigned extra objective, this can be done as many times as a player wishes.
    - Each extra roll increases the cost by 25 creds

Extra Objectives and Skill points

- The Extra Objectives will also award **Skill Point(s) (SP)** based on the difficulty of the extra objective.
    - 2 Skill Points for easy Extra Objectives
    - 3 Skill Points for moderate Extra Objectives
    - 5 Skill Points for hard Extra Objectives
- These are in addition to the guaranteed 1 skill point given per mission completion and are added to the general skill points pool.

Easy Extra Objectives

Roll 1d12

1VP/ 2SP	Easy Extra Objectives	
Number	**Objective Name**	**Description**
1	**Forward Edge**	End a unit's activation inside the enemy normal spawn
2	**Shock and Awe**	Have one infantry kill 2 enemy infantry during a mission
3	**Rear Guard**	Keep one of your units within your deployment zone by the end of Turn 3.
4	**Blade and Fury**	Kill an enemy infantry with melee.
5	**They Fly Now**	Kill an enemy infantry after it jumped
6	**No Trespassing**	Have no enemy units within 12” of your spawn edge at the end of the mission.
7	**Measured Advance**	Have all your units outside from your deployment zone by the end of Turn 2.
8	**Momentum**	Have all your units cross the midline of the map by the end of the mission
9	**Pursuit Force**	Damage or kill an enemy unit during each turn of the game, except turn 1.
10	**Precision Fire**	Kill an infantry in a single attack outside short range.
11	**Beginners Luck**	Have 2 different enemy units attack one of your infantry and have the infantry survive
12	**Focused Barrage**	Have at least 2 units attack a single enemy unit in a turn.

Moderate Extra Objectives

Roll 1d20 - If an objective cannot be completed because the required unit type or game mechanic is unavailable in the current mission, reroll it.

2 VP/ 3SP	Moderate Extra Objectives	
Number	**Objective Name**	**Description**
1	**High Ground**	Kill an enemy while at least 3” higher than it.
2	**Unbroken Wall**	Finish the mission with at least 60% of your original force alive and on the battlefield
3	**Hijack**	Have a unit that can Hijack kill the Operator of a Coreborn with their ability
4	**Hardened Steel**	Have one Coreborn take damage from 3 sources and suffer no Breaches.
5	**Ruthless Efficiency**	Destroy more units than you lose by the end of the mission.
6	**Bloodthirsty**	Have a friendly infantry kill an enemy in melee with a critical hit.
7	**Overkill**	Kill/Destroy an enemy unit with at least 2 extra damage, or a Breach
8	**Hold Ground**	Have an infantry within 3” of the battlefield center for 2 consecutive turns
9	**Kill the Meat**	Kill the Operator of a Coreborn with anything except an Expeller.
10	**Called Shot**	Have a unit shoot and kill an enemy with a Tier 5 or 6 die.
11	**Save the Runt**	Have a Coreborn survive a mission with less than or equal to 50% Structure.
12	**Planned Strike**	Do not kill any enemy Infantry until after turn 2.
13	**Hard Hitters**	Have a **single type** of Infantry deal all the damage to a Coreborn and destroy it or force it to retreat.
14	**Shield Wall**	Have none of your Coreborn suffer 2 or more Breaches by the end of the mission.
15	**Sniper Shot**	Have a unit kill an enemy unit at its max weapon range.
16	**Overwatch**	Have a unit ranged kill an enemy engaged in melee combat with an ally
17	**Sweeping Advance**	End the mission with more of your units on the enemy side of the battlefield than they have on yours.
18	**Sneaky Snake**	Have at least 1 unit take no damage for 3 consecutive turns.
19	**Cautious Advance**	Have at least one infantry not sprint the whole mission.
20	**Silence**	End a turn after turn 1 where none of your units fired.

Hard Extra Objectives

Roll 1d12

4 VP/ 5SP	Hard Extra Objectives	
Number	**Objective Name**	**Description**
1	**Establishing Dominance**	Have an infantry stand still (still able to fire) within 6” of the enemy spawn edge and breach an enemy Core or kill a VET.
2	**Hunters Edge**	Kill, force eject, or force retreat 2 infantry piloting Coreborn in one mission.
3	**True Corebreaker**	Destroy an enemy unit by rolling a crit on the final breach
4	**Economy Round**	Start the mission with a Coreborn that is damaged and have it survive, not retreat, and in your control at the end of the mission. (if chosen, start 1 Coreborn at 50% structure rounded down. All structure repairs on this Coreborn are free after this particular mission)
5	**Lucky Shot**	Kill an Infantry with a Tier 1 (White) dice roll.
6	**Dialed In**	Breach a Coreborn with a Tier 1 (White) dice roll.
7	**No One Left Unscathed**	Destroy (dont let retreat) at least 60% of the enemy force before the mission ends
8	**Hot Shot**	Have one Infantry kill 4 separate enemy units in a single mission.
9	**Suicidal Charge**	Have a Coreborn engage in melee with at least 2 other enemy Coreborn at once.
10	**Blade Dancer**	Have a unit move out of melee and not get hit by the opportunity attack and then fire and kill the unit it disengaged from
11	**Focused Fire**	Have 5 units attack a single enemy unit in a turn, the 5th attack must kill the target.
12	**Cut Down**	Have an infantry hit a breach roll from a Tier 2 (Green) or less die as the final breach.

Infantry Skills, Injury and Death in a Campaign

Skill Points Pool

- All Skill Points earned during missions are added to a **shared global pool**.
- Any Infantry unit, Trooper or Veteran, may spend points from this pool to acquire new skills.
- If a Trooper is killed, all of their learned skills along with the Skill Points used to obtain them are lost permanently and not returned to the pool.

Gaining Skills Points

- At the start of a campaign, each player receives **2 points** to spend on Infantry skills.
- After each mission, players gain 1 additional point**.**
- Players may accumulate more points by completing Extra Objectives.
    - See "Extra Objectives" section for reference.
- **Each player gains 1 SP for each enemy VET that player's team takes out of action.**

Trooper (TRP) Death

- All troopers die when taken off the board (reduced to 0HP)
    - Troopers do not die when they retreat off the map.
- They do not roll on an injury chart, or roll to survive.

Veterans (VET) Death

- When taken off the board (reduced to 0 HP), Veterans roll a **1d6** and consult the injury chart after the mission.

Promotions

- Any trooper (TRP) may be promoted to veteran (VET) by spending 3 skill points from the general pool.

Skill Limits

- Each infantry may have up to 3 skills (excluding Promotion to Veteran).
- Skills cannot be removed once purchased

Gaining Skills

- Skills have a cost, when choosing to purchase a skill, **Roll twice on the Skill Table for the chosen Level and choose one result.**
- Infantry cannot have the same skill twice.
    - Reroll any dice that roll an already owned skill.
    - An infantry may spend 2 SP to reroll one of their rolled dice, this may only be done once per skill roll.
- Any infantry, trooper or veteran, can be given skills.
- If a Trooper is killed, they lose all skills and no points are refunded.
- If a Veteran dies from an injury roll, they give 2 skill points back into the skill point pool.

Infantry Promotion		
Name	**Cost**	**Skill**
Promotion	3	Change Trooper (TRP) status to Veteran (VET)

Coreborn Training		
Name	**Cost**	**Skill**
Coreborn Training	2	No penalty when piloting a Coreborn

Infantry Skills (Level 1) (1d6)			
Roll	**Name**	**Cost**	**Skill**
1	**Sprinter**	1	Sprint distance is now double regular movement distance.
2	**Field Improvisation**	1	Once per mission, reroll one attack this infantry made.
3	**Combat Medic**	1	Restore 1 HP to a friendly infantry unit within 1” once per activation. This counts as the infantry’s firing action.
4	**Ambusher**	1	Once per mission, if attacking from a standstill and at short range, ignore all enemy dodge when shooting.
5	**Rock Climber**	1	This unit only spends 1” of movement per 1” climb. If the infantry is a Sniper, gain +2” movement instead.
6	**Artillery Spotter**	1	Can spot for artillery through terrain up to 8”

Infantry Skills (Level 2) (1d20)			
Roll	**Name**	**Cost**	**Skill**
1	**Ghost Movement**	2	Move through enemy units and don't trigger opportunity attacks. Cannot charge through enemies with charge.
2	**Coordinated Assault**	2	If attacking same target as last friendly unit, attack with +1 Accuracy
3	**Adrenal Surge**	2	Gain +2” movement
4	**Precision Hunter**	2	Once per mission, before rolling, one hit is counted as a crit on a chosen attack.
5	**Mine Awareness**	2	This infantry cannot set off traps or mines. (only applies while outside a Coreborn) If this infantry is a Saboteur, increase disarming die tier to Tier 5 (Blue). If this infantry is a Sniper or Shade, gain the ability to disarm traps on a Tier 3 (Yellow) roll that cannot be modified.
6	**Small Signal Jammer**	2	So long as they are within 2” of this unit shutdown all enemy drones and reduce enemy Coreborn Accuracy by -1
7	**Rear Arc Specialist**	2	+1 Ranged Accuracy when attacking a Coreborn in its rear arc.
8	**Focused Shot**	2	Once per mission, attack with +2 Accuracy
9	**Fire Resistance**	2	Ignore the bonus damage to this infantry given by +Fire attacks
10	**Combat Surgeon**	2	Once per mission, heal an infantry within 1” of this infantry to full HP and give them +1 max HP for the remainder of the mission. This counts as the infantry’s shooting action.
11	**Coreborn Support**	2	Give any friendly Coreborn within 2” +1 Accuracy on their attacks.
12	**Hold the Objective**	2	+2 Dodge when touching or within an objective and choosing to standstill. Lose this bonus when in melee.
13	**Bomb Suit**	2	Reduce damage taken from Explosive weapons by 1.

Infantry Skills (Level 2) (1d20)			
Roll	**Name**	**Cost**	**Skill**
14	**Tactical Roll**	2	Once per mission, move this infantry up to 2” away from its position when targeted for an attack.
15	**Last Stand**	2	Once per mission, after being shot at, take a shot at the enemy infantry at -2 accuracy. This can still trigger if this infantry dies.
16	**Ground Cover**	2	Enemy Artillery and Explosive attacks cannot target the ground within 3” of this infantry. (It can still scatter into that range.)
17	**Jump Pack**	2	Give this infantry the jump pack ability. If they already have this ability, they ignore the 3” needed to mount a Coreborn.
18	**Ceramic Plates**	2	Once per mission, if this infantry would take 3 or more damage in a single attack, reduce the damage taken by 2. If the infantry that receives this ability is a Vanguard they treat the first two crits dealt to them as hits..
19	**Dodge and Weave**	2	+1 Dodge
20	**Save the best for Last**	2	If this Infantry activates last, gain +1 Accuracy to the next attack this activation.

Infantry Skills (Level 3) (1d6)			
Roll	**Name**	**Cost**	**Skill**
1	**Evasive Maneuvers**	4	Twice per mission, force a reroll of an enemy units attack against this infantry. This does not apply to explosive attacks.
2	**Resilient**	4	The first time this infantry would be taken out of action, instead it stays on the field with 1 HP remaining. This activates before “Undying” and is in addition to that skill. If the infantry that gains this skill is a Commander, **instead** they change their passive to have 2 max HP instead of 1 max HP. If combined with “Undying” increase it to 3.
3	**Hit-and-Fade**	4	After attacking, if the infantry did not move and did not standstill, this infantry can move up to its max distance instead of half.
4	**Close Quarters Expert**	4	Have no dice penalty when being charged by enemy infantry. And increase melee damage by 1.
5	**Recycling Munitions**	4	Use any level 1 or 2 skill or any active ability that says “once per mission” twice per mission.
6	**Trigger Discipline**	4	Ignore enemy cover bonuses if within half range.

Infantry Skills (Level 4) (1d6)			
Roll	**Name**	**Cost**	**Skill**
1	**Expert Tactician**	6	Auto-win initiative once per mission. Even if you wouldn't draw for it.
2	**Expert Marksman**	6	+1 Ranged Accuracy at long range
3	**Inspiring Presence**	6	All friendly infantry within 6” of this infantry may reroll their attack dice once per mission.
4	**Quickfire**	6	Twice per mission, fire twice at the same target at -1 Ranged Accuracy for both shots
5	**Return Fire**	6	Twice per mission, if shot at, choose to fire back at -1 Ranged Accuracy. If combined with “Last Stand” ignore the Accuracy penalty from “Last Stand” and “Return Fire”
6	**Snapshot**	6	Once per mission, fire at all targets in LOS but at -1 Ranged Accuracy for each shot.

Coreborn Proficiency Infantry Only Skills

The next set of skills is only available to Operators, Expellers, Outriders and those with the “Coreborn Training” skill.

Operators, Expellers, Outriders, and “Coreborn Training” Infantry only Skills (Level 1)			
Roll	**Name**	**Cost**	**Skill**
1	**Smooth Operator**	2	While piloting a Coreborn, +1 more Accuracy in a standstill.
2	**Quick Start**	2	While piloting a Coreborn, +4” movement on its first activation
3	**Hand-to-Hand Master**	2	While piloting a Coreborn, increase Fists damage by 1, give them +1 Accuracy and give them +1 Melee Recalibration.
4	**Better Ammunition**	2	While piloting a Coreborn, +4” Firing distance to standard ranged weapon attacks. If the weapon has a listed range, this does not increase that range.
5	**Smack Down**	2	While piloting a Coreborn, +1 Melee Recalibration if attacking an infantry in melee without sweeping.
6	**Stable Platform**	2	While piloting a Coreborn, friendly infantry attempting to ride this Coreborn roll +1 Dice Tier

Operators, Expellers, Outriders and "Coreborn Training" Infantry only Skills (Level 2)			
Roll	**Name**	**Cost**	**Skill**
1	**Shake it Off**	3	While piloting a Coreborn, enemy riders roll -1 Dice Tier to stay on.
2	**Bodyguard**	3	While piloting a Coreborn, this unit may choose to take a ranged attack from a single attack aimed at a friendly unit within 3". Can only happen once per turn. Act as if this unit is the one attacked for modifiers. This may only occur if the attacker can see both this unit and the original unit it was attacking.
3	**Take Over**	3	**If Expeller or Outrider**: Roll Tier 5 (Blue) dice for attempting to hijack a Coreborn **If any other infantry:** Gain the ability "Hijack"
4	**Cross Counter**	3	While piloting a Coreborn, when attacked in melee, this Coreborns melee always hits first unless the opponent rolled a crit, in which case treat it as normal for melee rules.
5	**Electronic Screech**	3	Once per mission, while piloting a Coreborn, force all enemy infantry to move 3" away from this Coreborn if they are within 4" This does not count as a firing action.
6	**Hunter**	3	While piloting a Coreborn: Gain +1 Ranged Accuracy against Coreborn in a Class number **Higher** than this unit Gain +1 Ranged Recalibration against Coreborn in a Class number **Lower than or equal** this unit

Operators, Expellers, Outriders and "Coreborn Training" Infantry only Skills (Level 3)			
Roll	**Name**	**Cost**	**Skill**
1	**Pinpoint the Weakness**	4	While piloting a Coreborn, this unit still rolls Breaches when hitting enemy Aeonite Shields.
2	**Corebreaking Specialist**	4	While piloting a Coreborn gain +1 Corebreaker
3	**Melee Master**	4	While piloting a Coreborn gain +2 Melee Recalibration.
4	**Coreborn Mechanic**	4	Twice per mission, if riding a friendly Coreborn, heal it by 2 structure. This counts as a firing action. This does not count as repairing for campaigns. Mark the original lowest Structure the Coreborn was at and mark it as what the Coreborn has at the end of the mission for post mission purposes.
5	**Like Swatting Flies**	4	While piloting a Coreborn, once per activation, automatically shake off one enemy infantry and deal 1 damage to them in addition to the damage they take from falling.
6	**Recalibrating the Computer**	4	While piloting a Coreborn, +1 Ranged and Melee Recalibration

Infantry Injury

- If an infantry with the designation Veteran (VET) is reduced to 0 HP during a mission they roll a **1d6** for their injury after the mission.
- All Major and Minor Injuries are healed through time and sometimes a small number of creds.
    - Players may wait out injuries in any way (example wait 1 battle, field, then wait another would be considered waiting 2 battles and get rid of BROKEN RIB)

Roll	Effect
1	**Major Injury**
2	**Psychological Trauma**
3	**Minor Injury**
4	**Psychological Trauma**
5	**Minor Injury**
6	**Full Recovery (No Injury)**

Rolling the same injury

- You cannot roll the same Major injury more than **once**
- You cannot roll the same Minor injury more than **twice**
- You cannot roll the same Psychological Trauma more than **once**.
- if you roll an injury that you already have the max of increase the result by 1
- if you already have that result decrease the original result by 1
- if you have both re-roll until you get a new one

Forced Retirement

- If an infantry is forced into retirement, they pass half their skill points (rounded up) into the general pool.
- A Veteran is forced to retire after receiving their **third** Major Injury, Psychological Trauma, or Permanent Damage result in any combination.
    - *Example: Having permanent arm nerve damage and a Shell Shock psychological trauma and then gaining a second psychological trauma will force retirement.*
- Gaining 4 minor injuries without healing them will cause the Infantry to go into Forced Retirement.
    - *Example: Having 1 broken arm, 1 cracked rib and 1 concussion that are not healed and then gaining a broken leg will force retirement.*

Minor Injuries

- An infantry can only roll each minor injury 2 times if they are unhealed. Except scratch and misdiagnosis
- When healed, remove the effect from the minor injury.

Roll	Name	Effect	Healing Process	Healed Name
1	**Misdiagnosed**	Roll on the Major Injury Chart. Cannot roll a 1 or 6 on that chart	N/A	N/A
2	**Cracked Rib**	This infantry takes 1 more damage from all sources	Sit out 2 battles.	Healed Rib
3	**Concussion**	If piloting a Coreborn have -1 Accuracy to Coreborn attacks.	Sit out 1 battle.	Healed Concussion
4	**Broken Arm**	-1 Accuracy and this infantry cannot melee	Sit out 1 battle and 10 creds.	Healed Arm
5	**Broken Leg**	-1 Dodge. (This can result in a negative dodge)	Sit out 1 battle and 10 creds.	Healed Leg
6	**Scratch**	Put some dirt on it and you'll be fine (no effect, this does not count as a minor injury)	N/A	N/A

Permanent Damage

- Any infantry that accumulates 2 of the same **unhealed** minor injuries will turn them into Permanent Damage.
- This injury cannot be healed.
    - *Example: Gaining 2 Concussions turns into Brain damage*.

Original Minor Injury Name	Permanent Damage Name	Permanent Damage Effect
Cracked Rib	Destroyed Ribs	This infantry takes +2 damage from all sources
Concussion	Brain Damage	This infantry cannot pilot a Coreborn
Broken Arm	Arm Nerve Damage	This infantry loses its vs Coreborn damage and cannot melee
Broken Leg	Leg Nerve Damage	This infantry loses 2 dodge (this can result in a negative dodge) and cannot sprint.

Major Injury

- Major injuries cannot be fully healed. They can only be treated.

Roll	Name	Effect	Treatment	Post Treatment Effects
1	**Fatal**	This infantry is considered dead. Add 2 skill points to the general skill point pool	None	None
2	**Missing Eye**	-1 Accuracy and shoot at half distance	Sit out 2 battles and 30 Creds	Shoot at half distance
3	**Arm Blown Off**	-2 Accuracy and cannot melee	Sit out 1 battle and 30 creds for a prosthetic	-1 Accuracy
4	**Leg Blown Off**	Move half distance and cannot sprint or move out of melee.	Sit out 1 battle and 30 creds for a prosthetic	Cannot sprint
5	**Major Chest Wound**	Take double damage from all sources	Sit out 2 battles and 40 creds	Take +1 damage from all sources
6	**Misdiagnosed**	Roll on the Minor Injury chart. Cannot roll a 1 or 6 on that chart	N/A	N/A

Psychological Trauma

- Psychological Traumas cannot be healed.
- If a unit kills one of its friendly units. That unit gains a Psychological Trauma at the mission whether they live or are taken out of action. This is in addition to any injuries gained from being taken out of action.

Roll	Name	Effect
1	**Near Death Experience**	Roll 1 x Tier 3 (Yellow). On miss, this infantry leaves the army immediately and refunds half its creds cost and adds 2 skill points to the general pool. On hit or crit, this infantry gains +2 to HP, +1 Dodge, or +2" Movement.
2	**Shell Shock**	Cannot sprint, if ending a turn within 4" of any unit that uses an +Explosive weapon, they take 1 damage.
3	**Megalophobia**	-1 Accuracy when attacking Coreborn
4	**Guilt**	-1 Accuracy when attacking Infantry
5	**Anxiety**	-1 Accuracy if within 6" of a friendly infantry. Cannot be deployed within 6" of any infantry.
6	**Agression**	Demote to TRP. Keep all skills, Augments and other things they had before.

Cyborg Augmentations

- Cyborg Augmentations are advanced surgical upgrades that enhance a soldier's capabilities. While powerful, these procedures carry significant risk, as the body may reject the augmentation.

Eligibility for Augmentation

- Only Veteran (VET) infantry may receive Cyborg Augmentations.
- If a VET suffers a Major Injury in a specific body area, they may choose to install a corresponding augmentation at half the listed Cred cost (rounded up).

What can be Augmented:

- The following body areas may be augmented:
  - Eyes
  - Arms
  - Legs
  - Chest
  - Spine
  - Brain
- When an augmentation is installed, it replaces both corresponding body parts (e.g., both arms, both legs, or both eyes).

Installation of Augmentations:

- To install an augmentation:
  - The infantry must be uninjured in the chosen area (unless replacing a Major Injury).
  - Pay the listed Cred cost.
  - The unit must sit out the listed number of missions. These missions must be consecutive, and the unit cannot be deployed or used in any capacity during this time.
  - **No more than 2 VET infantry may undergo augmentation at the same time.**
  - When installing an augmentation, roll 1 × Tier 5 (Blue) die but lower the dice tier by 1 for each installed Augment.
    - To a minimum of White dice.
    - *Example: An infantry with 2 existing augmentations attempting a third must roll 1 x Tier 3 (Yellow).*
  - If the roll is a miss, the augmentation fails.

Universal Benefits:

- Any augmented body area cannot suffer injuries when rolling on the Injury Charts.
- Treat any injuries that would affect that area as a “Scratch”

Universal Deficits:

- Cyborg Augmentations are unstable and may be rejected.
- **If an Augmentation installation fails:**
    - The augmentation is rejected and is not installed.
    - The infantry immediately suffers the listed Failed Augmentation Effect for that upgrade.
    - Failed Augmentation Effects are permanent and cannot be removed or healed by any means.
    - The infantry may not attempt that same augmentation again.
- **An infantry that has suffered a failed augmentation:**
    - May still attempt other augmentations, following all normal rules.
    - The failed augmentation still counts as an existing augmentation when determining how much to lower dice tier for future installation attempts.

Cyborg Augmentations Chart:

Upgrade	Price to Upgrade	Bonus Effect	Failed Augmentation Effect
Augmented Eyes	30 Creds and 1 mission	+4” Range for Ranged Attacks and gain +1 Ranged Recalibration	Reduce ranged attack range by half and treat all enemies as always in cover.
Augmented Arms	30 Creds and 1 mission	+1 Damage in Melee and always hit first in Melee	-1 Melee Accuracy and always hit second in melee
Augmented Legs	30 Creds and 1 mission	Gain the ability to jump like jump jets. This is unaffected by effects that disable jump jets.	Cannot sprint and require a 1” of movement to move over anything that is 1” tall.
Augmented Chest	40 Creds and 2 mission	Reduce damage taken by 1 (Cannot reduce damage to 0)	If any attack would deal at least 1 damage, take 1 more damage.
Augmented Spine	40 Creds and 2 missions	+1 to all Recailibration when piloting a Coreborn.	-1 to all Recalibration and Accuracy when piloting a Coreborn
Augmented Brain	50 Creds and 2 missions	Ignore all gained or to be gained Psychological Traumas	This infantry can no longer gain skill points and cannot spend gained skill points.

Becoming an Outrider

- Outriders are Elite Pilots who have gained fame and recognition for their battlefield prowess.
- In Corebreakers:, Outriders are special because they have a unique special ability that applies to their Coreborn.
    - This is the only way for a Coreborn to gain an ability.
- A Veteran may become an Outrider if they have either one Level 4 skill or at least two skills totaling 5 or more SP. The player then spends 5 SP to promote them.

Outrider Promotion (Operator and Expeller Only)		
Name	**Cost**	**Skill**
Promotion	5SP and either 1 level 4 skill or at least 2 skills totalling a worth of at least least 5 skill points	Change Operator or Expeller to Outrider.

Outrider Cards

- Outriders have their own stat card.
- Outriders are considered VET and can roll skills as normal.
- When promoted to Outrider, **choose one skill** from the list on the next page.
- Outriders can pilot other Coreborn but have no special skills with them.

Outrider Coreborn

- When an Outrider is created, they may choose one Coreborn in the army to claim as their own
- This Coreborn is considered the Outriders personal Coreborn and may adopt one the skills below.
    - This skill is only applied if an Outrider is operating the Coreborn
- After each mission, the Coreborn is repaired for free but an Outrider may be paid an upkeep of 30 creds after each mission.
- If an Outrider cannot be paid or is chosen to not be paid, they will not be allowed to be taken on any missions until their debt is paid.

Outrider Coreborn Abilities

Outrider Skills	
Name	**Skill**
Duelist	When attacking another Coreborn in Melee and with no other units within 4”, Gain +2 Melee Accuracy
Salvager	When attacking another Coreborn in Melee, heal 1 Structure if this Outriders Coreborn dealt any damage.
Combo Blow	This Outrider Coreborn can use ranged weapons in melee, can attack with both melee and ranged while in melee, with both attacks rolling -1 Accuracy
Tank	Ignore the first Breach affecting this Coreborn. And ignore stat deductions from any breaches.
Transport	All friendly infantry riding this Coreborn cannot be knocked off and are shot at with -1 Ranged Accuracy from outside sources including Snipers. Friendly riders also ignore the “firing while riding Coreborn” penalty
Warlord	All friendly Infantry within 6” of this Coreborn shoot with +1 Accuracy
Infantry Killer	Ignore enemy cover. Once per mission, ignore all terrain between this Outrider Coreborn and the target.
Adaptive Armor and Special Munitions	Ignore the first application of each secondary effect (Fire, Shutdown, etc.) once per mission. Also apply +1 token of any type when firing a weapon that applies a token. (Except Desync)
Hunters Mark	At the start of each mission choose a target, this Coreborn gains +2 Ranged and Melee Recalibration until it is dead, retreated or disabled. When the target is gone, choose a new target

After Action Report Sequence

Step 1: Tally Creds Gained, SP and (If Applicable) Salvage Tally Creds and SP gained from the mission and roll for salvage.
Step 2: Injuries Roll on Injury Chart for VETs taken out of action and apply injuries.
Step 3 (Optional): Repairs, Healing and Cyborg Augments Repair Coreborn, Heal Injuries, Gain Cyborg Augments and pay Outriders.
Step 4 (Optional): Black Market Roll to attempt to find the Black Market.
Step 5 (Optional): Tempo or Sabotage Use Creds to buy Tempo or Sabotage for use in the next mission.
Step 6: Increase Maximums Increase the Army's maximum Cred/Infantry/Coreborn limits to those listed for the next mission.
Step 7 (Optional): Purchases Buy new units and equipment and hire Outriders.
Step 8 (Optional): Skills and Promotions Gain and assign new Skills and Promotions.
Step 9: Update Update army list.
