Corebreakers Rulebook

V0.0.95

Glossary

Authors Note:

Please note that this game is still in very early testing. Many words are not universal and many rules are not fully balanced. If you have any suggestions for changes/additions please use the suggestions in google docs. This game is meant to have high lethality, reward close range gameplay, and most of all be fun.

What is Corebreakers?

Corebreakers is a tactical sci-fi tabletop wargame focused on combined-arms combat between infantry units and mechs known as Coreborn

Coreborn act as the anchors of the team where their customizability allows for a variety of playstyles.
Infantry come in a wide variety of styles that support, kill and defend against enemy attacks.

Combat in Corebreakers uses a Dice Tier system where stronger attacks and better positioning improve the quality of dice rolled.

Core Rules Overview

Hit, Miss, and Crit

- Hit - A successful attack that applies damage and/or effects.
- Miss - No Effect.
- Crit - A more powerful version of a hit that may deal additional damage or effects

Dice Tiered System

- Dice use a custom set of dice in a Tiered system. Higher Dice Tiers represent greater Accuracy and increase the likelihood of Hits and Crits.

Dice Tier	Dice Color	Hits	Crits	Misses
1	**White**	**1**	**0**	**5**
2	**Green**	**1**	**1**	**4**
3	**Yellow**	**2**	**1**	**3**
4	**Purple**	**3**	**1**	**2**
5	**Blue**	**4**	**1**	**1**
6	**Red**	**3**	**2**	**1**

Making an Attack

- Roll 1 die per point of listed damage.
- Roll additional dice separately.
- Dice Tier determines Accuracy.
    - *Example - 2 x Tier 3 dice (Yellow) is 2 damage at Accuracy 3. So on an attack, roll 2 yellow dice.*
- Dice cannot be lowered below Tier 1 (White) or raised higher than Tier 6 (Red).

Optional Rule: Playing without Dice Tiers

- Corebreakers can be played without Dice Tiers, but it is recommended to have 6 different colors of dice.
- Below is the chart on how to play Corebreakers with normal, colored dice:

	Dice Color	1	2	3	4	5	6
1	White	Miss	Miss	Miss	Miss	Miss	Hit
2	Green	Miss	Miss	Miss	Miss	Hit	Crit
3	Yellow	Miss	Miss	Miss	Hit	Hit	Crit
4	Purple	Miss	Miss	Hit	Hit	Hit	Crit
5	Blue	Miss	Hit	Hit	Hit	Hit	Crit
6	Red	Miss	Crit	Hit	Hit	Hit	Crit

Imaginary Dice Tiers

- When resolving a die roll, apply all modifiers before enforcing limits.
    - The resulting value may temporarily exceed Tier 6 or drop below Tier 1.
    - After all modifiers are applied, cap the final Dice Tier between Tier 1 (White) and Tier 6 (Red).
- *Example: A roll of Tier 4 dice with +2, +1, +1 and -1 results in an imaginary dice at Tier 7 but when rolled it is reduced to Tier 6 because that is the maximum Dice Tier that can be rolled.*

Dice Tier Hit Percentage Table

Tier	Color	Number of Dice	One Die Hit Percent	One Die Crit Percent	Chance of a Hit or Crit
1	White	1	16.67	0	16.67
		2	30.56	0	30.56
		3	42.13	0	42.13
		4	51.77	0	51.77
2	Green	1	16.67	16.67	33.33
		2	30.56	30.56	55.56
		3	42.13	42.13	70.37
		4	51.77	51.77	80.25
3	Yellow	1	33.33	16.67	50.00
		2	55.56	30.56	75.00
		3	70.37	42.13	87.50
		4	80.25	51.77	93.75
4	Purple	1	50.00	16.67	66.67
		2	75.00	30.56	88.89
		3	87.50	42.13	96.30
		4	93.75	51.77	98.77
5	Blue	1	66.67	16.67	83.33
		2	88.89	30.56	97.22
		3	96.30	42.13	99.54
		4	98.77	51.77	99.92
6	Red	1	50.00	33.33	83.33
		2	75.00	55.56	97.22
		3	87.50	70.37	99.54
		4	93.75	80.25	99.92

Expected Damage Table

Tier	Color	Number of Dice	Expected Damage	Highest Damage with Crits
1	White	1	0.17	1
		2	0.33	2
		3	0.50	3
		4	0.67	4
2	Green	1	0.50	2
		2	1.00	4
		3	1.50	6
		4	2.00	8
3	Yellow	1	0.67	2
		2	1.33	4
		3	2.00	6
		4	2.67	8
4	Purple	1	0.83	2
		2	1.67	4
		3	2.50	6
		4	3.33	8
5	Blue	1	1.00	2
		2	2.00	4
		3	3.00	6
		4	4.00	8
6	Red	1	1.17	2
		2	2.33	4
		3	3.50	6
		4	4.67	8

Key Terminology

Armor - Defenses focused on protecting from breaches.

Army - The entire set of units in a game/campaign.

Core - Technology of immense energy that power the Coreborn.

Coreborn - Mechs that run on Core power.

Creds - Short for Credits, the main currency in Corebreakers.

Detachment - The set of units used in a mission.

Infantry - Any human soldier. Designated as Trooper (TRP) or Veteran (VET)

Operator - The person piloting the Coreborn.

Outriders - Special Operators that have heavily modified Coreborn.

Aeonite Shields - Fields of energy that can regenerate and block damage.

Structure - The frame of a Coreborn and its durability.

Stat Keywords

Accuracy Keyword

+ Artillery, Ranged and Melee Accuracy (AA, RA, MA) - How accurate the weapon is.

Recalibration Keyword

+ Artillery, Ranged and Melee Recalibration (AR, RR, MR) - How effective the targeting computer is.

Offensive Keywords

+ Corebreaker - The effectiveness of the weapon to Breach another Coreborn's Armor.

+ Explosive - Weapons with this keyword affect all units within their blast radius.

+ Ignore Guard - This weapon has extreme armor piercing and will ignore any enemy Guard and deal increased breach damage.

+ Guard Wreck - This weapon has amazing armor piercing ability and will deal increased breach damage.

+ Indirect Fire - The ability to fire without seeing a target.

Defense Keywords

+ Guard (G) - The likelihood for the armor to resist being pierced.

Ignore the first Breach stat deduction - The Core is given redundancies to allow it to continue functioning at peak efficiency even when its core is damaged.

Weapon Keywords

+ Regen Disable - The weapon has the ability to disable enemy Aeonite Shields on hit.

Status Effects

+ De-Sync - A unit affected by De-sync loses part of its connection to its pilot, the pilot loses some control from its Coreborn temporarily.

+ Fire - Coreborn set on fire will have their movement reduced and infantry take extra damage.

+ Shutdown - A complete loss of power. The Coreborn is rendered immobile, cannot make attacks and its shields are taken offline.

Mines

Mined - Explosives hidden in the ground that explode and deal damage to any units that walk over them.

Universal Keywords

Activation - During the time that the unit is chosen to start its actions

Crit - Critical Hit

Dodge (Dg) - The ability for the unit to avoid an enemy attack.

DRN - Drone

Forward Spawn - This unit spawns in a special area of the map

Jump Jets (JJ) - This unit has jets that allow it to reposition to new and favorable locations.

LOS - Line of Sight. The sightline of the infantry model.

Melee - Action that uses the rules for Engaged Melee

Movement (Mv) - the distance the unit can move

TRP - Trooper

Range (Rg) - The maximum range that the weapon or infantry can fire.

Round - Active until both players finish Activating all their units

Shoot - Action that uses the ranged value for attacking

Smoke - A thick cloud of smoke

Unit - Any Infantry or Coreborn.

VET - Veteran

Infantry

- Infantry are the most common type of unit in Corebreakers. There are many kinds of infantry, all with their own playstyle.

Infantry Stat Card Example

- All infantry have their own stat card. Use the image below to find out how to read stat values.

<table>
<tr><td colspan="2">1. Runner</td><td>2. HP: 2</td><td>3. 30</td></tr>
<tr><td>4. Range: 12”</td><td>5. Mv: 14”</td><td>6. Dodge: 2</td><td>7. TRP</td></tr>
<tr><td colspan="2">8. Vs Infantry
3 x Tier 2 (Green)</td><td colspan="2">9. Vs Coreborn
1 x Tier 2 (Green)</td></tr>
<tr><td colspan="4">10. Passives

Jump Pack: can jump up to their movement value to land on Coreborn or terrain.

Coreborn Rider: No riding penalty when firing while riding on a Coreborn. Also roll +1 Dice Tier for staying on when riding an enemy Coreborn.</td></tr>
<tr><td colspan="4">11. Active: Coreborn Cripple: When mounted on a Coreborn, use an anti-Coreborn attack against the ridden Coreborn at 2 x Tier 4 (Purple) tier attack and roll the breach die starting at Tier 4 (Purple) die. This ignores the Aeonite Shields and Dodge of the target Coreborn.</td></tr>
</table>

1. Name of Unit	7. Type of Unit
2. Health Value	8. Damage and Accuracy vs Infantry
3. Cost to Purchase	9. Damage and Accuracy vs Coreborn
4. Ranged Attack Range	10. Passive Abilities
5. Movement Range	11. Active Abilities
6. Dodge Value	

Infantry Health

- When an infantry unit takes damage and does not die, place a die next to their model with their remaining health number facing up.
    - *Example: an Operator takes 2 damage. Place a die next to the model with the number '1' facing up.*

Infantry Types and Color

- All Infantry will have a color associated with them for clarity. The color may be placed anywhere on the model so long as it is clearly visible. It may also be painted onto the base.

Core Infantry Units

Rifleman - Green

- Riflemen are the backbone of every detachment. Cheap, plentiful, and armed with a basic rifle. They are best suited for fighting other infantry. They have access to special level-ups and can be promoted into Vanguards.

Corebusters - Red

- Corebusters specialize in eliminating Coreborn with their heavy rocket launchers. They excel at breaching cores and inflicting devastating structural damage. They can also use specialty rockets to burn Coreborn or De-Sync them.

Runners - Teal

- Runners are the fastest infantry on the battlefield. Armed with submachine guns and equipped with jump packs, they can outmaneuver most foes. Their mobility allows them to leap onto Coreborn and strike directly at their cores with deadly efficiency.

Expellers - Orange

- Expellers are highly trained Operator-killers. Armed with submachine guns, jump packs and a knife, they can assault cockpits directly to eliminate the pilot inside a Coreborn. Though expensive, they are also trained Coreborn pilots, making them valuable both in and out of their machines.

Snipers - Camo

- Snipers excel at long-range combat. Equipped with precision rifles, they can easily eliminate infantry, even those riding atop Coreborn. They carry grapple hooks for scaling terrain and have the ability to cross mines and traps without triggering them.

Specialists

Saboteurs - Purple

- Saboteurs are infiltration specialists, armed with shotguns for devastating close-range combat. They excel at laying and disarming mines and traps, and possess the training to avoid triggering them entirely.

Shades - Black

- Shades use their personal stealth fields to blend with the environment. They are also equipped with a special silenced pistol for quiet take downs.

Commanders and Operators

Operators - Blue

- Operators are elite Coreborn pilots, unmatched in their ability to handle the machines. Outside of their Coreborn they are poorly equipped, armed only with a pistol and limited combat ability.

Commanders - Gold

- Commanders are the most valuable and expensive infantry in a detachment. There can only ever be one Commander per army. Armed with a bullpup rifle, they inspire nearby infantry, buffing their performance and enhancing survivability. Commanders are Veterans from the start and can stave off death where others would fall.

Drone Warfare

Drone Controllers - Yellow

- Drone Controllers remotely pilot quad-rotor drones to scout and harass enemy forces. Armed with only an auto pistol, their real strength lies in their drones. If a drone is destroyed, the Drone Controller has a backup. If a Drone Controller dies, its drone remains on the field in a standstill. It may still use its passive but may no longer shoot or move or use its active.

Quad Rotor Drones - Silver

- Quad Rotor Drones are operated by Drone Controllers. They can spot enemies for infantry, fire at enemy positions, or detonate themselves to damage infantry and burn Coreborn alike.

Special Infantry

Vanguard - Pink

- Vanguards are the most elite infantry in a detachment. They are upgraded Riflemen, promoted through special level-ups rather than purchased outright.

Outrider - Maroon

- Outriders are special types of infantry who are considered a cut above the rest. They are often seen as the best infantry on the field and have specially customized Coreborn that they refuse to let anyone else touch.

Coreborn

- Coreborn are the biggest threat on the battlefield, they are highly customizable and are often the deciding factor in a battle.
- Please see the "Coreborn Creation Rules" Rulebook to see how to build a Coreborn.

Table Setup, Initiative and Deployment

Terrain Placement

- Play is recommended on a 4'x4' table.
- Each player places 3 large terrain pieces (at least 5"x5").
- Each player places 8 small terrain pieces (at least 1"x1")
- Total of 6 large and 16 small terrain
- After large and small terrain is placed, use the Terrain Roll system to determine how much more small terrain is added.
    - *Author's Note: While this is the intended way to play, feel free to place terrain as your playgroup sees fit.*
- Each player is responsible for making sure there are no problematic line of sight issues.
    - *Example: Player A can see the entire deployment zone of Player B from across the entire map without climbing a different piece of terrain.*

Terrain Roll System

- Starting with the player with the lower unit count, players alternate placing 1 small terrain piece.
- After each piece is placed past the initial amount above, roll 1 x Tier 4 (Purple) die:
    - **Hit:** Continue placing terrain starting with the player with the lower number of units. Then alternate if another hit is rolled. Continue to roll the die after each placement.
    - **Crit:** Immediately place two small terrain pieces (one by each player), then continue rolling.
    - **Miss:** Stop placing terrain immediately.
- Terrain must be placed at least 2" from the nearest other terrain piece.
- No unit should have line of sight to an enemy at the start of the match.

Initiative Cards

- At the start of the game, each player receives a number of Initiative Cards equal to the total number of rounds in the mission. These cards are numbered from 1 up to the number of rounds.
- *Example: In a 5-round mission, each player receives Initiative Cards numbered 1–5.*

Determining Initiative

- At the start of each round:
    1. Both players secretly select one unused Initiative Card.
    2. Reveal both cards simultaneously.
    3. The player who revealed the higher number gains Initiative for that round.
    4. Both revealed cards are discarded and cannot be used again.

Initiative Ties

- If both players reveal the same number:
    - The player who did not have Initiative in the previous round gains Initiative.
- If this occurs in Round 1:
    - Return both revealed cards to their owners.
    - Both players select a different unused Initiative Card.
    - Reveal simultaneously again.
- Repeat this process until the Initiative is determined. Cards revealed during tied redraws in Round 1 are not discarded.

Fully Tied Initiative

- If players exhaust all their cards tying each time, determine initiative with a roll of 1 x Tier 3 (Yellow) dice instead.
    - Crit>Hit>Miss
- Only do this if every card was used and tied each time during a turn

Deployment

- To deploy units, both players take turns placing one unit at a time in their mission dependent deployment zones. The player who lost initiative, or the player chosen by the player with fewer units, places first. Continue alternating until all units are placed.

Forward Spawns

- On Round 2 Players will deploy any units with a Forward Spawn keyword on their respective round.
- They may do this at any point during the round.
- All units spawned this way may spawn and move/act on that turn with an Accuracy penalty.
- Units with this keyword do not have to spawn this way.
- All units who spawn this way have -1 Accuracy the turn they spawn.

Turn Structure and Actions

General Play Actions

- Each player will activate one unit at a time. After a unit activates, the next player will activate a unit. Each time a unit activates, at the end of their activation place an activation token next to their model. This continues until there are no units left to activate. Then a new round begins. Remove all activation tokens.

A Unit May:

- Move then attack
- Attack then Move up to half its available Movement
- Move then use an active ability
- Use an Active Ability then Move up to half its available Movement
- Standstill

A Unit Cannot:

- Sprint after Attacking
- Sprint after using an Active Ability
- Attack and use an Active Ability in the same activation, unless stated otherwise
- Shoot while Engaged with an enemy infantry, unless stated otherwise
- Enter Engagement range after Attacking.

Standstill

- A unit may declare Standstill at the start of its activation.
- A unit declaring Standstill:
    - Cannot Move, Sprint or change facing during that activation
    - Loses all Dodge until the end of the round
    - Gains +1 Ranged Accuracy
- Units riding a Coreborn cannot declare Standstill.

Active Abilities

- Active abilities count as firing actions for the purposes of the action phase.

Activation Tokens

- At the end of a unit's activation, place an activation token next to its model.
- Standard Movement: White Activation Marker
- Sprinting Movement: Yellow Activation Marker
- Jumping Movement: Red Activation Marker
- Standstill Movement: Black Activation Marker

Movement Rules

Movement

- A unit moves up to its movement stat on its card.
- A unit can move any amount of distance in any direction up to its movement value.
- Movement distance is based on the center of the base of the model.
- An infantry unit cannot move through enemy units.
- Even at 0" movement, a unit may still turn on its activation.
- Units may rotate freely during movement unless stated otherwise.

Sprinting

- +50% Movement Speed
- -1 Accuracy on the next firing or active ability that has a dice roll this activation.
- Any unit cannot Sprint if the unit has already fired or melee'd this activation

Coreborn Sprinting

- Coreborn Cannot Sprint under normal circumstances.

Infantry Terrain Movement

- Infantry may move over any terrain less than or equal to 1” for free
- Infantry can climb any terrain at a rate of 2” movement to 1” height.
    - There must be enough area under the base to sit on top for the infantry to be valid to sit on top of or move over
- Infantry may move off a terrain piece of 3” or lower normally
- If the Infantry does not have jump jets or grapple hooks, any terrain 4” or taller they move off of will deal damage equal to the difference from 3”.
    - *Example: if a Rifleman unit moves off a 5” terrain piece, it will take 2 damage.*

Coreborn Terrain Movement

- If a Coreborn runs over a piece of terrain that is less than or equal to 2”x2”x2” they destroy the terrain.
    - *Author’s Note: It is better advised to discuss between players what kind of terrain on the field is destructible and what is not.*
- Coreborn cannot move over terrain that is more than 3” unless they have and use jump jets

Jumping (General Rules)

- Any unit with jump jets may jump up to its jump movement profile **in a straight line only**, replacing its normal movement for the activation.
- A unit may only jump one time per activation.
- A unit cannot **move, sprint or fire** before jumping, and cannot **move or sprint** again after jumping.
- Units may jump over terrain up to half their jump distance and must land in an area that can accommodate their base.
- **Jump jets do not gain distance with standard movement increases.**
- Any unit that jumps must designate it with a token.
- **A unit that has jumped cannot jump again the following turn.**

Infantry Jump Jets

- Only infantry with jump packs can jump.
- Infantry with jump packs can jump onto and ride Coreborn.
    - An infantry that has jumped onto a Coreborn does not gain a dodge bonus from jumping.
- Infantry cannot jump onto other infantry.
- **Infantry gain +1 dodge for the remainder of the turn after jumping.**

Coreborn Jump Jets

- Coreborn must land in an area that can accommodate its base size.
- If a Coreborn lands on a destructible terrain piece less than or equal to 2” tall and 4”x4” wide, it destroys the terrain.
    - *Author’s Note: it is better to discuss with your opponent what is and is not destructible.*
- If a Coreborn lands on a destructible terrain piece larger than 2” tall and 4”x4” wide, it deals damage to the terrain equal to its size +1.
    - Except Class V which will deal 3 damage.
    - This will always hit
    - If the terrain is not destroyed, the Coreborn lands on top of the terrain.
        - This still deals damage to the terrain.
- Coreborn cannot jump onto a terrain piece that cannot support the base if it would not destroy the terrain.

Infantry Jumping Across Gaps or onto Coreborn

- Any Infantry may jump freely between adjacent elevated areas (no penalty) so long as the zones are equal to or less than 2” apart and are the same height or the area that the infantry unit is going to is lower.
    - If the gap between areas is between 2.125 and 3”, and the infantry doesn't have jump jets, they roll a 1 x Tier 3 (Yellow) to see if they jump the gap.
    - Infantry without jump jets cannot jump more than 3” across a gap.
    - If an infantry fails to jump a gap, they fall to the ground and take 1 damage per 1” of height past 2”.
- An infantry unit cannot jump onto another adjacent elevated area if that area is 1” or more higher than the starting elevated area. Unless they have and use Jump Jets
- Any Infantry may attempt to jump onto Coreborn from a 2” or higher building at any time. Treat this as riding a Coreborn normally. Ignore the 3” requirement for jumping onto Coreborn.

Combat

Line of Sight (LOS)

- A unit has LOS if its model's head can see at least 33% of an enemy model.
- For shooting, the distance is based from edge-of-base to edge-of-base
- If two units have 2” or more woods or other terrain that can be walked through and gives a defense bonus in between them, there is no LOS
- Units cannot fire through enemy units.
- Units may fire through friendly units.
- *Authors Note: A LOS laser will be incredibly helpful*

Targeting Multiple Units

- If a weapon can target multiple units,
    - Split the attack dice evenly between the targets.
    - Reduce the Dice Tier of all attacks by 1.
    - Each target resolves its attack separately.
- The first number says how many units it may split fire by.
- The second number is how many inches apart the units may be to split fire.
    - *Example: "2 Split Fire 3" means this attack may split its attack across 2 units so long as they're 3 or fewer inches from each other and in LOS of the attacking unit.*

Retreating

- **Starting on turn 3, or once any Primary Objective is completed (whichever occurs first), units on either side may Retreat.**
- To Retreat, a unit must move off the battlefield via its own spawn edge.
- A unit that Retreats is immediately removed from play.
- For Campaign rules involving Retreat, refer to Corebreakers: Machina Campaign Rules.

Cover

- Cover is determined by Line of Sight:
    - **<33% visible**: Target cannot be attacked
    - **33%–66% visible:** Target gains Cover bonus
    - **>66% visible:** No Cover bonus
- Cover bonuses do not stack.
- *Author's Note: Players should agree on what terrain reasonably provides cover.*
- **ADD PIC HERE**

Encompassing Cover

- Encompassing cover represents terrain that surrounds units without clearly blocking their model.
- Units wholly within such terrain (e.g. trees) always gain Cover.
- Any ranged attacks against them are treated as firing at a fully covered target.
- Two units in melee do not gain the encompassing cover bonus.
- All other cover rules still apply.
- Make sure encompassing cover is clearly defined and recognizable.
- *Examples of encompassing cover:*
    - *Forrest*
    - *Smoke*
    - *Rubble*
- *Author's Note: Players should agree on what terrain counts as encompassing cover before a match begins.*

Shooting Through Other Units

- Units cannot shoot through enemy units.
- Units may shoot through any friendly units.
- If a Coreborn is between a unit and its target, the target cannot be targeted for direct attacks.

Ranged Combat

- **All Coreborn Ranged weapons have a maximum range of 20", unless stated otherwise.**
- If infantry fire at a target within half their maximum range, increase Accuracy by +1 Dice Tier.
    - **This bonus does not apply to Coreborn.**

Critical Hits

Against Infantry

- Each Crit deals 2 damage instead of 1.

Against Coreborn

- Crits do not get increased damage against Structure.
- Instead, if at least one Crit was rolled, increase the Breach Roll to Tier 5 (Blue).
- Additional Crits count as Hits.
- Crits against Shields will deal 2 damage rather than 1.

Breach Crits

- If a Breach Roll Crits deal +1 Structure Damage

Attacking Arc

- Units have no attacking arc. They may attack with 360 degrees vision and attacking arc

Melee Combat

Entering Melee (Engaged)

- Two or more units within 1” of each other's base edges are considered to be Engaged.
- Units in melee:
    - cannot fire ranged weapons unless otherwise specified
    - Must follow the rules for leaving melee combat

Infantry Engaged with Coreborn

- If a Coreborn and Infantry are within melee range, only the Infantry is considered Engaged.
    - An infantry Engaged with a Coreborn may still use ranged attacks but may only target any Coreborn target(s) they are in melee with.
    - The Coreborn may leave melee range without provoking an Opportunity Attack.

Making a Melee Attack

- **Melee attacks are rolled as a single die, regardless of damage dealt.**
    - *Example: Even if the weapon would deal 4 damage, only 1 die is rolled.*
- Each unit rolls its melee dice according to their Accuracy.
    - Infantry have a standard die to roll and then apply modifiers.
    - Coreborn roll based on their melee weapon and then apply modifiers
- All melee damage is resolved simultaneously, unless a Crit is rolled.
- If one side rolls a Crit, that unit’s damage resolves first.
    - *Example: An attacker rolls a Hit, the defender rolls a Crit. The defender’s damage resolves first and deals 3 damage which may kill the attacker before they have a chance to deal damage.*
- Units that cannot deal melee damage do not roll melee attacks.

Melee Modifiers

- **Dodge is halved (rounded down) for all units in melee**
- Cover is ignored
- Melee does not gain Accuracy bonuses from half range
- **Units shooting into infantry in melee do so at -1 Ranged Accuracy.**
    - Infantry firing at a Coreborn they are Engaged with does not count as firing into melee and does not suffer the -1 Accuracy penalty.

Infantry Melee

- Infantry melee starts as 1 × Tier 3 (Yellow) before modifiers.
    - Hit: 2 damage
    - Crit: 3 damage
- If two Infantry units are Engaged with each other, both roll 1 × Tier 3 (Yellow)
- Infantry cannot Charge, Melee, or otherwise deal melee damage to Coreborn unless a rule explicitly allows it.
    - Infantry engaged with a Coreborn do not make melee attacks unless a rule allows it.

Coreborn Melee

- Coreborn melee Accuracy, damage and other stats are determined by the equipped melee weapon.
    - Hitting in melee automatically grants +1 Corebreaker
    - Melee attacks against other Coreborn ignore Aeonite Shields

Sweeping Attacks

- Most Coreborn melee weapons have a Sweep stat.
- Place the sweep template on the base of the Coreborn if choosing to use a sweep attack.
- All units within the template are attacked separately.
    - Sweep attacks suffer –1 Melee Accuracy
- A Sweep is treated as a single attack for activation and ability purposes, but each target is resolved separately.
- Sweeps have a range of 1” out from the base unless otherwise stated.
- **NEED DIAGRAM HERE**

Firing Into Melee

- If a unit fires into a melee involving friendly and enemy units, roll 1 × Tier 3 (Yellow):
    - **Hit or Crit:** Hits an enemy unit
    - **Miss:** Hits a friendly unit
- If more than two units are in the melee:
    - The roll determines whether the shot hits the declared target or the closest unit
    - If the declared target is the closest, hit the next closest instead

Attack of Opportunity

- If a unit leaves melee combat, the opposing unit may make an Attack of Opportunity.
    - Rolled as 1 × Tier 2 (Green)
    - Cannot be modified
- A unit may only make one Opportunity Attack per round.
- Opportunity Attacks ignore rear arc bonuses.
- **Coreborn do not trigger Opportunity Attacks when leaving Engagment with Infantry.**

Special Melee Attacks

Attacking the Infantry Riding a Coreborn

- As its melee action, a Coreborn may attacking any infantry riding it.
- If the attack misses, after Recalibration is applied, the Coreborn takes half the potential non-crit damage of the attack rounded up.
- This ignores Aeonite Shields
- This does not roll for Breach.

Run-Over

- When a Coreborn moves into or through enemy Infantry, it may attempt a Run-Over attack.
- Roll:
    - 1 × Tier 3 (Yellow), reduced by the Infantry's Dodge
    - If the Coreborn Sprinted, instead roll 1 x Tier 4 (Purple).
        - This attack is unaffected by any modifiers for Ranged or Melee.
    - **Hit:** Infantry takes 2 damage
    - **Crit**: infantry takes 3 damage
    - **Miss**: Infantry avoids the impact
- Surviving Infantry are placed in base contact at the nearest legal position.
- If no legal placement exists, the Infantry is destroyed.
- This does not count as an attack, it counts as part of the Coreborns Movement.

Charging

- If a unit moves at least 50% of its movement in a straight line toward an enemy **(excluding Sprint)**, it may Charge.
    - Defender Dodge is reduced by 1
    - A Charge uses the unit's movement and attack for the turn
    - Charging counts as the units movement and melee action.

Infantry Charging

- Rolled as 1 × Tier 3 (Yellow)
- **Hit:**
    - Deal 2 damage
- **Crit:**
    - Deal 3 damage
- If the Charge misses, the defender gets to melee attack.
- Infantry may only charge other Infantry from a side not protected by cover
    - Infantry in encompassing cover can still be charged from any direction
- **Defender does not roll a melee die, unless the attacker missed.**

Coreborn Charging

- Rolled as the Accuracy of the melee weapon with appropriate modifiers.
- Coreborn Defender rolls their melee weapon -1 Accuracy.
- If the Charge misses, the attacker takes 1 structure damage. This does not roll for Breach.

Core Impact

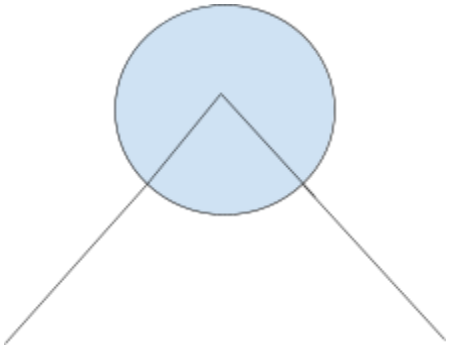

- A Core Impact is a charge performed using Jump Jets.
    - Rolled as 1 × Tier 4 (Purple), reduced by the defenders dodge
    - Attacker lands in base contact at the closest edge
- **Hit:**
    - Deal Class +2 damage.
        - Unless it is a Class V Coreborn. In which case, deal 5 damage.
    - Attacker takes half damage back (rounded up)
    - Both units suffer 1 x Tier 5 (Blue) breach roll (unmodifiable).
- **Miss:**
    - Defender takes no damage
    - Attacker still takes damage, but no Breach is applied.
- A Core Impact ends the unit's activation.
- Infantry cannot perform Core Impacts.
- Core impacts count as both a melee attack and a movement for the activation.

Coreborn Jumping onto Infantry

- If a Coreborn attempts to land on Infantry:
    - Roll 1 × Tier 4 (Purple), reduced by the Infantry's Dodge
    - **Hit or Crit:** Infantry takes damage equal to the Coreborn's Class +2
        - Unless it is a Class V Coreborn. In which case, deal 5 damage
    - **Miss:** Infantry is moved outside the base with no damage
- On hit or miss, move the infantry outside of the base of the Coreborn if they survive.
- Using this ends the activation of the Coreborn.
- This counts for both movement and the action for the Coreborn

Rear Arc

- Draw two lines 90 degrees onto the base of the coreborn, this is its rear arc
- Attacks that hit a Coreborn in its rear arc deal +1 damage.
- Infantry do not have rear arcs.
- Mark this on the base of the model before it play.

Using Keywords and Stats in Play

Dice Tier Limits

- No Dice Tier may ever be reduced below Tier 1 (White) or increased above Tier 6 (Red), regardless of modifiers, rerolls, or special rules.

Accuracy

- Increase the Tier of all dice rolled by the Accuracy stat.
    - *Example: +1 Ranged Accuracy = increase Ranged Dice Tier by 1.*

Corebreaker

- Increase the Dice Tier of the breach roll by the Corbreaker stat.
    - *Example: +1 Ranged Corbreaker will increase the Dice Tier of the ranged breach roll by 1.*

Guard

- Reduce the Dice Tier of an enemy breach roll by the Guard stat.
    - *Example: +1 Guard will reduce the Dice Tier of any enemy breach by 1.*

Forward Spawn

- Units with the “Forward Spawn” keyword do not deploy with the rest of the detachment at the start of the mission.
- Instead, they may enter play during **Round 2**, they may deploy into their designated Forward spawn zones.
- When they enter the battlefield, they may move and act normally that round.
- If a mission does not include designated Forward spawn zones, they deploy with the detachment’s other infantry but may spawn up to 6” further into the map.
- **Any unit that spawns on a forward spawn has -1 Accuracy the turn they spawn**

Recalibration

- **+ Artillery Recalibration (AR)** - After rolling attack dice, a unit may reroll misses up to its Recalibration value. When rerolling, lower the Dice Tier for rerolled dice by 1 each time it is rerolled.
    - *Example: Artillery Recalibration +2 lets you reroll the Artillery die twice total. The first reroll will lower the Dice Tier by 1. If chosen to roll again, the second reroll will lower the Dice Tier by another 1.*

- **+ Ranged Recalibration (RR)** - Once per activation, a unit may reroll ranged attack dice a total number of times equal to its Recalibration stat. These rerolls may be applied to any of the unit's ranged attack dice, including rerolling the same die multiple times.
    - **When rerolling, lower the Dice Tier for rerolled dice by 1.**
    - *Example: A unit with Recalibration 4 rolls 3 ranged attack dice and gets 2 Hits and 1 Miss. It may spend up to 4 total rerolls in any combination rerolling the Miss multiple times, rerolling different dice, or splitting the rerolls between them as long as no more than 4 rerolls are used.*

- **+ Melee Recalibration (MR)** - Allows a unit to reroll the melee die whether they missed or not. When rerolling, lower the Dice Tier for rerolled dice by 1 each time it is rerolled.
    - *Example: Melee Recalibration +2 lets you reroll the Melee die twice total. The first reroll will lower the Dice Tier by 1. If chosen to roll again, the second reroll will lower the Dice Tier by another 1.*

Dodge

- Reduce the incoming attack Dice Tier by the dodge stat.
    - *Example: 2 dodge decreases an attacker Tier 4 (Purple) dice to Tier 2 (Green) dice.*
- In melee, dodge for the defender is reduced by half rounded down.
    - *Example: 1 dodge is reduced to 0 dodge in melee*

Coreborn Dodge

- Corebron dodge is maxed at 2 unless the primary attribute of the Coreborn is dodge.
    - If the Coreborns primary attribute is dodge, the maximum dodge is 3.

Dodge Overflow

- A unit can have up to 2 dodge applied at a time (unless its primary attribute is dodge), but can gain extra dodge beyond that as overflow. Overflow does not increase the active dodge, but it protects the unit from dodge reductions.
    - *Example: if a unit has 2 applied dodge and 2 overflow, and it would lose 2 dodge, the overflow absorbs the loss first. The unit keeps 2 applied dodge, and the overflow drops to 0.*

Structural Integrity

- For every full **4 Structure remaining**, reduce incoming Structure damage by 1 (minimum 1).
- This reduction:
    - Applies only to Structure damage
    - Does not apply to Crit damage
- **Exception: Having 17 or more structure will also reduce crit damage taken by 1.**
    - *Example: having 9 structure remaining reduces damage taken by 2, having 3 structure remaining reduces damage taken by 0*

Guard Wreck

- **Start the breach die at Tier 6 (Red) before factoring in the remaining enemy Guard**. If a crit is rolled in the breach roll, **deal 2 structure damage instead of 1**.

Ignore Guard

- Act as if the enemy has **0 Guard** and **start the breach die at Tier 6 (Red)**. If a crit is rolled in the breach roll, **deal 3 structure damage instead of 1.**

Infantry Combat Modifiers Table

Combat Modifiers (Infantry)	
Condition	**Modifier**
Attacker declared standstill	+1 Dice Tier
Attackers Accuracy bonuses	+1 Dice Tier per +Accuracy
Attacker is within half weapon range.	+1 Dice Tier
Attacker sprinted this activation	-1 Dice Tier
Defenders dodge	- Dice Tier per Dodge
Defender is riding a Coreborn	-1 Dice Tier
Defender is in Cover	-1 Dice Tier

*All + modifiers **increase** the Tier of the dice.*

*All - modifiers **decrease** the Tier of the dice.*

The minimum Die Tier is 1 and the max is 6.

Coreborn Combat Modifiers Table

Combat Modifiers (Coreborn)	
Condition	**Modifier**
Attacker declared standstill	+1 Dice Tier
Attackers Accuracy bonuses	+1 Dice Tier per +Accuracy
Attacking Coreborn is piloted by an Operator	+1 Dice Tier
Attack is indirect	-1 Dice Tier
Defenders dodge	- Dice Tier per Dodge
Defender is Riding a Coreborn	-1 Dice Tier
Defender is in Cover	-1 Dice Tier

*All + modifiers **increase** the Tier of the dice.*

*All - modifiers **decrease** the Tier of the dice.*

The minimum Die Tier is 1 and the max is 6.

Coreborn Rules

Piloting

- Any unit may pilot a Coreborn
- Operators are the best pilots and gain a +1 Accuracy Modifier when piloting a Coreborn
- Expellers and other infantry with Coreborn Training have no deficits or benefits when piloting a Coreborn
- All other infantry incur a -1 Accuracy Modifier when piloting a Coreborn

Unpiloted Coreborn

- Any infantry may pilot a Coreborn.
- To pilot a Coreborn, an infantry must move **(not sprint or jump)** into base contact with the unpiloted Coreborn.
- They may then use their firing/active ability action to enter the Coreborn
- The Coreborn then gains the ability to move/fire/use actions that turn.
    - The newly piloted Coreborn may only move up to half its movement the turn it is piloted this way.
- An Unpiloted Coreborn cannot activate, move, attack, or use abilities until piloted, unless a rule explicitly states otherwise.

Coreborn Call-In Setup

- Coreborn are not placed like normal units during deployment. Instead they are called in during the mission.
- **Rules for Coreborn Call-In:**
    - Place 6 2”x2” Coreborn Call-in Markers on the field with the following conditions:
        - At least 6” from each other.
        - At least 12” from either spawn edge.
        - At least 4” from the neutral table edges.
    - **Infantry cannot call in a Coreborn if they sprinted.**
    - Infantry may stand with their base at least half within a marker and spend their firing action to call in a Coreborn.
        - The marker is removed after use.
    - Each player may only claim and use as many Coreborn call-in Markers as they have Coreborn.

Coreborn Call-In in action

- Step 1: Claim Marker
    - An Infantry unit wholly within a Call-In Marker may spend its firing action to claim it.
    - The Infantry cannot Sprint the activation they Call-In
- Step 2: Maintain Control
    - If the Infantry remains within the marker until the start of its next activation the Coreborn arrives.
    - If the infantry dies, leaves the marker or becomes Engaged with an enemy infantry, the Call-In fails.
- Step 3: Spawn Coreborn
    - At the start of the next turn, place the Coreborn centered on the marker
    - The claiming infantry becomes the pilot
    - Remove the marker.
    - The newly piloted Coreborn becomes part of the Activations just like any other unit.
- Step 4:
    - If an enemy is within 2” of the marker when the Coreborn arrives, spawn the Coreborn unpiloted and move all infantry outside its base to the closest edge and not Engaged.

Coreborn Call-In Damage

- The Coreborn spawns in the center of the marker that it was called in from.
    - If the Coreborn touches the base of a Coreborn, **deal 5 damage to each Coreborn and roll 1 x Tier 5 (Blue) Die (unmodifiable) for breach on the target that was landed on.**
        - Resolve all collision effects simultaneously.
        - This damage ignores Aeonite Shields, Guard and Dodge.

Uneven Number of Coreborn

    - If one player has 2 more Coreborn on the field than the other, the player with fewer Coreborn may have a Coreborn spawn next to any friendly infantry.
        - This may only happen once per game per player.
        - This check is made at the start of the turn before initiative draws.
- Coreborn called in this way may act on the round they are called in so long as they are piloted by an infantry.

Breaches (Corebreaking)

- No single attack may cause more than one Breach unless explicitly stated.

Coreborn Breaches

- When a Coreborn attack deals at least 1 point of Structure damage to another Coreborn, make one Breach Roll to determine if the Core is breached.
    - Base Die Tier: Tier 3 (Yellow)
    - **Weapon Corebreaker:** Increase the Breach Die Tier by +1 per Corebreaker
    - **Target's Guard:** Reduce the Breach Die Tier by –1 per Guard
    - **Rolling a Critical Hit:** If the attack roll included at least one Crit, start the Breach Roll at Tier 5 (Blue) instead of Tier 3 (Yellow)
- If a Crit is rolled on the Breach Roll, the defending Coreborn suffers 1 additional Structure damage.
- **Breach Rolls cannot be rerolled under normal circumstances.**

Infantry Breaches

- When Infantry attacks deal Structure damage to a Coreborn, resolve Breaches as follows:
    - Base Die Tier: Tier 2 (Green), unless otherwise stated
    - **Target's Guard:** Reduce the Breach Die Tier by –1 per Guard
    - **Rolling a Critical Hit:** If the Infantry attack roll included at least one Crit, start the Breach Roll at +1 Dice Tier.
- If a Crit is rolled on the Breach Roll, the Coreborn suffers **1 additional Structure damage**, this damage cannot be blocked by any means.

Effects of a Breach (Corebreak)

- On the **first** breach, the Coreborn will lose its **secondary** attribute including any bonuses from its Core
- On the **second** breach, the Coreborn will lose its **primary** attribute including any bonuses from its Core
- On the **final** breach, the Coreborn will be **destroyed**.
- If a Core would reduce the number of breaches on a Coreborn, it will lose its **Primary and Secondary** attributes on the **first** breach and then be **destroyed** on the **final** breach.
- If a Core would only allow the Coreborn to have one breach, when breached, the Coreborn is destroyed.

Aeonite Shields

- Aeonite Shields regenerate at a fixed rate during each of the unit's activations.
- **Aeonite Shields are limited to a maximum of 2 shields regenerated per turn.**
    - **Unless their primary attribute is Aeonite Shields.**
- Shields regenerate up to their maximum value and cannot exceed it.
- If a unit has active Aeonite Shields:
    - Structure damage is not applied unless the shields are reduced to 0 or bypassed.
    - Breach rolls are not made unless Structure damage is dealt.
- Weapons or abilities that bypass Aeonite Shields apply Structure damage normally.
- Aeonite Shields are ignored in melee combat.

Coreborn Retreat Conditions

- A Coreborn may always Retreat if either of the following is true:
    - It is at or below half of its structure, rounded down.
    - It has suffered half of its maximum Breaches, rounded down.
- These conditions override mission restrictions unless explicitly stated otherwise.

Ejection

- Infantry piloting a Coreborn may Eject if both of the following conditions are met:
    - There is no Infantry riding the Coreborn.
    - The Coreborn is not in melee with another Coreborn..

When an Infantry Ejects

- The Infantry is immediately removed from the battlefield.
- The Infantry counts as having Retreated.
- The Coreborn remains in play but is considered Unpiloted.
- An Unpiloted Coreborn may be piloted by another Infantry as allowed by mission or unit rules

Coreborn Destruction

- When a Coreborn is reduced to 0 structure or 0 breaches, it is considered destroyed and taken off the field.
- The Pilot inside is considered out of action and also taken off the field.

Tokens, Status Effects and Explosives

Inflicting Tokens

- When an attack inflicts one or more tokens, roll one die per token at the same Dice Tier as the attack.
    - **Hit:** Inflict 1 token
    - **Crit:** Inflict 2 tokens
- *Example: A Heavy Flamer has +1 Fire. When it attacks a Coreborn, roll 2 × Tier 3 (Yellow) dice for damage, then roll 1 × Tier 3 (Yellow) die to determine Fire tokens.*
  Even if the damage roll misses, a successful token roll still inflicts the token.

Turning off Cooling Systems

- At the end of an activation, a Coreborn may declare that it is switching off its cooling systems.
- If it does this, add a Fire Token to the Coreborn. This occurs after any other tokens would be removed. Therefore it will not be removed until the end of the following activation.

Losing Tokens

- At the end of each unit's activation, they lose 1 of each type of token that is applied to the unit.
    - *Example: If a Coreborn has 2 fire tokens and a desync token it will lose the desync and 1 fire token at the end of its activation.*

Status Tokens

- If anything indicates to roll an extra die, such as for status effects, such as De-Sync, **roll that die separately to the rest of the dice and mark which it is before rolling**. Alternatively, roll the extra die before or after rolling the damage die/dice.
- **Status Effect dice cannot be rerolled with Recalibration**

Fire

Against Coreborn

- Each Fire token reduces movement by 2”
- Fire tokens do not reduce jump jets
- Fire tokens are removed at the end of the Coreborn’s activation

Against Infantry

- Fire deals additional damage instead of tokens.
- For each +Fire, roll an additional damage die instead of inflicting Fire tokens.

Against Riders

- If a Coreborn with Infantry riders takes Fire damage:
  - The rider suffers 1 damage per fire token applied to the Coreborn.
- If a rider activates its turn while the Coreborn it is riding is on fire, they take 1 damage per token.
- If an infantry would land on a Coreborn with a fire token, the rider takes 1 damage per token.

Smoke

- Smoke uses a template defined on the unit or weapon card.
  - Infantry within Smoke gain +1 Dodge
  - Units cannot see through Smoke (unless otherwise stated)
  - Units can see into the smoke from outside the smoke.
  - Units within smoke may still fire at units outside or inside the smoke.
  - Smoke blocks Line of Sight through its template.
  - Smoke lasts 2 turns, including the remainder of the turn it is deployed
  - A unit may only have one active Smoke at a time

De-Sync

- A De-Synced Coreborn loses one action on its next activation.
  - It may either move or attack/use an ability, not both
  - If it attacks, it does not count as a Standstill
  - De-Sync attacks deal 1 damage to the target Coreborn Shields if they have any
- **On crit, still only apply one token.**
- De-Sync does not affect infantry.

Shutdown

- A Shutdown Coreborn:
  - Cannot act during its next activation
  - Loses all Dodge
  - Loses Aeonite Shields
- A unit cannot be Shutdown again until it has completed an activation.
- A unit cannot be forced into Shutdown more than once per turn.

Mines

- All mines use a 2” radius unless otherwise stated.
- Mines persist until they detonate or are cleared by a special rule.
- A unit that starts its activation within a mine’s radius does not trigger it unless the unit moves.
- A mine detonates when a unit moves into or through its radius.
- If mines are deployed via Artillery, resolve their placement using all normal Artillery rules for scatter.

Effects (Non-Token)

Ignore First Breach Stat Deduction

- The first time this unit suffers a Breach, ignore the resulting attribute loss.
- This still counts toward total Breaches for destruction.

Regen Disable

- A unit hit by a weapon with the Regen Disable keyword cannot regenerate Aeonite Shields on its next activation and **loses all its Aeonite Shields.**
- Multiple hits do not stack; only one turn of regeneration is skipped.

Explosives

- Any weapon with a blast radius that deals damage or has the “explosive” keyword is considered an explosive attack.
    - When targeting a Coreborn or the ground, explosive attacks hit **both the Coreborn and any rider**
    - Explosive attacks cannot target a rider directly
- Explosive attacks roll for damage against each target in the blast radius separately.

Advanced Rules

Riding Coreborn

Mounting

- Any infantry with jump jets may ride Coreborn by jumping onto them
    - They must have at least 3” of movement remaining when reaching the Coreborns base.
        - If they jump from a terrain piece equal to or higher than 3” they ignore needing 3” of their movement.
- Any other infantry may ride Coreborn by moving onto it from a terrain piece equal to or higher than 3”.
    - This still follows the rules for falling off terrain
- Only 1 infantry may ride a Coreborn at a time
- The model for a Coreborn must be able to have a 25mm base sit on it
    - *If both players agree, the model does not have to have this requirement. Instead place the riding model in base contact with the Coreborn but treat it as if it were riding the Coreborn for LOS.*
- For Line of Sight and targeting purposes, infantry riding a Coreborn are considered to occupy the Coreborn’s full silhouette and height.

Remaining Mounted

- While riding an enemy Coreborn, each time the Coreborn is activated, if it moves, the infantry on the Coreborn must make a 1 x Tier 3 (Yellow) roll to determine if they fall off.
- While riding a **friendly** Coreborn, each time the Coreborn is activated, if it moves, the infantry on the Coreborn must make a 1 x Tier 4 (Purple) roll to determine if they fall off.
- If a Coreborn (friend or foe) jumps, the infantry riding must roll 1 x Tier 2 (Green) to determine if they fall off.

Falling

- If an infantry falls off a Coreborn in any way, they take 1 damage from falling and are placed in base contact with the Coreborn.
    - The player whose infantry fell chooses where the model is placed.

Attacking While Mounted

- Any attacks by infantry riding a Coreborn attacks against that Coreborn ignores any Aeonite Shields it has.
- If an infantry is riding a Coreborn, they attack infantry and Coreborn except the one they're riding at -1 Accuracy
    - **Except Runners**

Targeting Riders

- If a unit attempts to fire at an infantry riding a Coreborn, they do it at -1 Accuracy
    - **Except Snipers**

Infantry Jumping onto a Coreborn with a Rider

Friendly Rider

- The rider may choose to disembark from the Coreborn and be placed in base-to-base contact with the Coreborn

Enemy Rider

- Act as if it were a charging melee attack.
- If the attacker kills the rider, replace the rider with the attacker (now riding the Coreborn)
- If the attack misses or fails to kill the attacker, place the attacker in base-to-base contact with the Coreborn. Follow all charging and falling rules.

Drones (DRN)

- Drones are shot at with the infantry attack statistics
- **Drones do not gain benefits of other infantry passive or actives unless they say “drone” or “unit”**

Purchasing Drones

- When a Drone Controller is purchased, they may buy **up to 2 drones** to be used in a mission or army. They may also be purchased during the purchase units phase of the upkeep in Campaigns.
- A Drone Controller is allowed to have no drones.

Drone Usage

- The Drone Controller may have up to 2 drones but only 1 deployed at a time. The Drone controller may place its remaining drone in base contact for free at the start of any activation so long as the first Drone is dead.
- If the controlling infantry dies, the Drone stays still and may still activate and fire at -2 Ranged Accuracy but its active and passive abilities are disabled.
- Drones spawn at the same time as and in base contact with their controller.
- Drones activate at the same time their controller does.

Drone Operating Range

- Drones may only operate within a fixed distance of their controller, measured using separate horizontal and vertical values.
- To determine a drone’s distance from its controller:
    - Measure the horizontal distance and record it on a die.
    - Measure the vertical distance and record it on a second die/dice.
        - These should be separate colors.
    - **The first 1” off the ground for a Drone is not recorded as vertical distance.**
    - Add both values together to determine the drone’s total distance from its controller.
- **This total distance cannot exceed the drone’s listed operating range.**
- *Example: A drone is 3” vertical and 6” horizontally away from the Drone Controller, it is considered to be 8” away since the first 1” off the ground vertical does not count.*

Drone Movement

- Drones may move over anything that is less than their vertical distance.
- Drones may only move vertically in 1” increments.
- Drones cannot sprint
- Drones may float up any terrain of 90 degrees or less at a rate of 1” height for 1” movement.
- They are considered to be 1” off the ground. They may move over any terrain lower than or equal to 2” for free.
- Drones do not trigger mines.

Shooting and Range

- When determining range to a target, measure both the horizontal and vertical distance between the drone and the target.
- Use the greater of the two distances when resolving the attack.
    - *Example: If a drone is 5” horizontally and 8” vertically from its target, use 8” as the range for the attack.*
- Drones cannot melee attack and cannot lock units into melee themselves but can be locked into melee.
- Drones do not gain the bonus from being within half distance or from standstill.

Cover

- Drones cannot take cover

Altitude Limit

- No drone may be positioned more than 10” above the battlefield.

Artillery

Artillery Properties

- Maximum Range: 36”
- Blast Radius: 2” template (unless modified by upgrades)
- Minimum Range: 6” (cannot be fired at units closer than this)
- Artillery must target the ground, not a unit
- Artillery does not gain Dice Tier bonuses from half range.

Resolving an Artillery Attack

1. Place the blast template at the target point.
2. Roll the Artillery attack die.
3. If the roll is a Hit or Crit, all units within the blast radius are automatically hit.
4. If multiple Coreborn are hit, roll Breach separately for each.

Indirect Fire (Artillery)

- Artillery may be fired indirectly if:
    - Another friendly unit has Line of Sight to the target point
    - That unit is within 10” of the target before the artillery fires
- Indirect Fire suffers –1 Dice Tier.

Artillery Scatter

- If the Artillery attack roll is a Miss, resolve scatter as follows:
- Roll 1 × Tier 3 (Yellow) die (cannot be modified or rerolled unless otherwise stated) to determine scatter direction and distance.
    - **Miss:**
        - The opposing player moves the blast template a distance equal to **double** the blast radius, measured from the original target point, in any direction.
    - **Hit:**
        - The opposing player moves the blast template a distance equal to the blast radius +1”, measured from the original target point, in any direction.
    - **Crit:**
        - The attacking player moves the blast template a distance equal to the blast radius +1”, measured from the original target point, in any direction.

Terrain Health

Destructable Terrain

- Unless otherwise stated or agreed upon, all destructible terrain has a Health value.
- Terrain Health is equal to twice the maximum height (in inches) that Infantry can legally stand on.
    - *Example: A building is 4” tall including decorative elements, but the highest flat surface that can support a 25mm Infantry base is 3”. That building is treated as 3” tall and therefore has 6 Health.*
- At 0 HP, a building is removed from the field.

Damaging Terrain

- Buildings may be targeted by attacks.
- When shot, terrain uses the attacking Coreborn's damage value.
- Coreborn may also attack terrain in melee.
    - Coreborn melee attacks against terrain deal +1 damage.
    - Infantry cannot melee buildings
- Any infantry on or in a building at a height of 2" or greater are killed if the building is destroyed

Targeting Terrain

- Buildings are considered immobile targets.
- Attacks against buildings gain +1 Accuracy.

Game Size, Unit Limits and Doctrines

For One Off Missions

- Maximum of 10 units.
- 400 Creds.
- No more than 1 Original Core.
- Attacker and Defender for missions are based on a 1 x Tier 3 (Yellow) dice roll, the player who won the dice roll chooses attacker or defender.
- The loser of the dice roll chooses a side of the table they want to use for home edge. The other player uses the opposite edge as their home edge
    - Miss<Hit<Crit.

For Campaigns

- Refer to "Corebreakers: Machina Campaign Rules" for the specific rules for campaign play.

Standalone Mission Detachment Restrictions

- Each unit type in Corebreakers: Machina has a limit in the total number a player can have in their detachment for a one off game.
    - Rifleman: 4
    - Corebuster: 3
    - Runner: 3
    - Saboteur: 2
    - Expeller: 2
    - Sniper: 2
    - Drone Controller: 2
    - Coreborn: 2
    - Operator: 2
    - Shade: 1
    - Commander: 1
    - Outrider: 0
    - Vanguard: 0

Doctrine Selection

- Before creating an army, each player may choose a Doctrine to run their army by.

Doctrine Name	Doctrine Benefit	Doctrine Drawback
Iron Wall Doctrine	+1 Accuracy to all friendly infantry on turn 2	No friendly units may sprint on turn 1
Precision Doctrine	Once per mission, a friendly infantry may turn one hit into a crit	Once per mission, the opponent may choose any rolled crit and change it to a hit
Initiative Doctrine	Once per mission, both players redraw their initiative cards, add +1 to this players initiative card when doing so	If you win initiative twice in a row without using this doctrines bonus, the opponent automatically wins initiative the next turn. Do not draw cards.
Rapid Pace Doctrine	Any friendly infantry may move up to 2” after being shot at.	Friendly Infantry lose the standstill bonus Accuracy
Relentless Doctrine	The first time a friendly Coreborn would be destroyed by Structure damage, it is left at 1 Structure (once per Coreborn per mission)	When a Coreborn resists destruction through this doctrine, it takes one Breach automatically.
Calibrations Doctrine	The first Recalibration reroll each turn does not reduce the Dice Tier.	Any Recalibration used by this players units,except this doctrines bonus, reduce their Dice Tier by 2 instead of 1
Spear Doctrine	Friendly Coreborn weapons gain +1 Corebreaker	Friendly Coreborn weapons cannot Sweep or Split Fire
Unified Doctrine	Once per turn, apply 1 Ranged Recalibration to a friendly **infantry’s** attack	Any friendly infantry lose 1 Accuracy if no allies are within 6” and LOS
Shadow Doctrine	Up to 2 friendly infantry gain the forward spawn keyword.	All infantry spawned in forward zones have an additional -1 Accuracy the turn they spawn
Whistle Doctrine	Friendly infantry can spot for artillery up to 6” through terrain	Friendly Infantry have -1 Accuracy in melee
Commanders Doctrine	Once per mission, activate a second infantry immediately after finishing the activation of a friendly infantry. The second infantry has -1 Accuracy	The first unit activated each round has -1 Accuracy

Base Sizes

Unit	Base Size
All Infantry	25mm
Class I	60mm
Class II	70mm
Class III	80mm
Class IV	90mm
Class V	
Offense	70mm
Defense	80mm
Speed	60mm

Infantry Stat Cards

Rifleman		HP: 2	20
Range: 16”	Mv: 6”	Dodge: 0	TRP
Vs Infantry 2 x Tier 2 (Green)		Vs Coreborn 1 x Tier 2 (Green)	

Passives (in pickup games, pick one of the below passives for each rifleman)
Malleable: Whenever given a skill, also choose one of the following passives. The same one cannot be chosen twice.

- **Kevlar** : Add +1 HP
- **Better Knives and Ammo**: +2” of range for its ranged attack and +1 Melee Accuracy (Including Charge)
- **Coreborn Training**: Have no penalties when piloting Coreborn

Vanguard (campaign only): if this unit is given all 3 skills above and has not been promoted to veteran, it is given a new stat card and changed to Vanguard class.

Corebuster		HP: 3	30
Range: 18”	Mv: 6”	Dodge: 0	TRP
Vs Infantry 2 x Tier 2 (Green)		Vs Coreborn 2 x Tier 4 (Purple)	

Passive: **Corebreaker**: Roll breach die starting at Tier 3 (Yellow)

Actives:
Incendiary Rocket: Fire an incendiary rocket at a Coreborn at 2 x Tier 3 (Yellow) if it hits, apply 1 fire token per hit to the Coreborn. If the attack crits, do not double the fire tokens. Instead, deal 1 damage to the Operator in addition. This deals no damage to the Coreborn.

Scrambler Rocket: Fire a Scrambler Rocket at a Coreborn at 1 x Tier 3 (Yellow). On hit apply De-sync to the Coreborn. This deals no damage.

Runner		HP: 2	30
Range: 14”	Mv: 14”	Dodge: 1	TRP
Vs Infantry 3 x Tier 2 (Green)		Vs Coreborn 1 x Tier 2 (Green)	

Passives
Jump Pack: can jump up to their movement value to land on Coreborn or terrain.
Coreborn Rider: No penalty when firing while riding on a Coreborn. Also roll +1 Dice Tier for staying on when riding an enemy Coreborn.

Active: **Coreborn Cripple**: When mounted on a Coreborn, use an anti-Coreborn attack against the ridden Coreborn at 2 x Tier 4 (Purple) tier attack and roll the breach die starting at Tier 4 (Purple) die. This ignores the Aeonite Shields and the dodge of the target Coreborn.

Expeller		HP: 3	40
Range: 10”	Mv: 12”	Dodge: 1	TRP
Vs Infantry 2 x Tier 3 (Yellow)		Vs Coreborn 2 x Tier 2 (Green)	

Passives

Jump packs: Jump up to full Movement to terrain or Coreborn.

Trained Operator: Have no penalties when piloting Coreborn.

Melee Expert : Add +1 Accuracy in melee vs INF (Including Charge)

Active: **Hijack**: When mounted on a Coreborn, can attempt to kill the Operator and take over the mech. This is rolled as 2 x Tier 3 (Yellow) dice. Deal 1 damage to the Operator per hit and 2 damage per crit.

Sniper		HP: 2	40
Range: 36”	Mv: 6”	Dodge: 0	TRP
Vs Infantry 3 x Tier 4 (Purple)		Vs Coreborn 1 x Tier 2 (Green)	

Passives

Superb aim: When firing at infantry riding Coreborn, do not take a shot penalty and ignore 1 dodge of the riding infantry.

Swift Feet: cannot trigger mines or explosive traps (does not apply if they are piloting a Coreborn.)

Terrain Master: This infantry can climb any terrain at any 90 degree or less angle at a rate of 1” movement to 1” height.

Commander		HP: 4	50
Range: 20”	Mv: 6”	Dodge: 1	VET
Vs Infantry 2 x Tier 4 (Purple)		Vs Coreborn 1 x Tier 2 (Green)	

Passives

Leadership: While alive, all friendly infantry within 3” and line of sight gain +1 Accuracy. (This does not effect itself)

Durable (Campaign only): The first time that the injury roll would roll a death, instead set this unit's max HP to 2 and have it survive. This still counts as a major injury.

Last Stand: the first time this infantry would have its HP reach 0, instead have its HP set to 1. (in a campaign, upon activating Last Stand, roll 1 x Tier 4 (Purple), on a miss, roll on the injury chart after the mission.

Saboteur		HP: 3	40
Range: 8”	Mv: 6”	Dodge: 0	TRP
Vs Infantry 2 x Tier 4 (Purple)		Vs Coreborn 2 x Tier 3 (Yellow)	

Passive: Swift Feet: Immune to mines & traps (not while piloting a Coreborn).

Actives:
Disarm: If touching the center of an explosive trap or mine, roll 1 x Tier 4 (Purple) die. On hit or crit disarm the mine, on a miss the mine explodes

Explosive Trap: Place on terrain ≤2” high or a 1” radius on the ground.
When triggered by Infantry or Coreborn;

- Infantry take 3 damage
- Coreborn take 2 damage + 1 Fire
  - the Operator takes 1 damage

Then remove the trap.

Saboteur Special Rules:

Forward Spawn

Drone Controller		HP: 3	40
Range: 10”	Mv: 6”	Dodge: 0	TRP
Vs Infantry 1 x Tier 2 (Green)		Vs Coreborn N/A	

Passive: **Drone Pilot**: This infantry controls **1** drone that can move about the battlefield with its own stat card.

Actives:

Coreborn Hack: If within 4” of an enemy Coreborn, may roll 1 x Tier 4 (Purple) die, on hit apply De-sync to the Coreborn. This deals no damage. This cannot be modified.

Explosive Drone: Detonate the drone.

- Infantry within 1” take 1 damage
- Coreborn gain 1 Fire token
- The Operator inside takes 1 damage

Quad Rotor Drone		HP: 2	10
Range: 10”	Mv: 10”	Dodge: 2	DRN
Vs Infantry 2 x Tier 2 (Green)		Vs Coreborn 1 x Tier 1 (White)	

Passives:

Drone Spotter: Enemy units within 2” and line of sight of this drone are attacked by other friendly units at +1 Accuracy (Drone bonuses do not stack)

Flying Disarm: If touching a mine or trap center, roll 1× Tier 3 (Yellow). On a Hit or Crit, it is disarmed. On a Miss, it detonates.

Operational Range: 16”

Outrider		HP:3	N/A
Range: 20”	Mv: 12”	Dodge: 2	VET
Vs Infantry 3 x Tier 2 (Green)		Vs Coreborn 2 x Tier 2 (Green)	

Passives

Jump Packs: May jump up to its Movement to land on terrain or a Coreborn.

Outrider Operator : While piloting a Coreborn, that Coreborn gains +2 Melee and Ranged Recalibration and +1 Melee and Ranged Accuracy.

Active: **Outrider Hijack**: When mounted on a Coreborn, can attempt to kill the Operator and take over the mech. This is rolled as 3 x Tier 4 (Purple) dice. Deal 1 damage to the Operator per hit and 2 per crit.

Vanguard		HP: 4	N/A
Range: 24”	Mv: 8”	Dodge: 1	VET
Vs Infantry 2 x Tier 4 (Purple)		Vs Coreborn 2 x Tier 3 (Yellow)	

Passives:

Resilience: If this infantry would take 2 or more damage in a single attack, reduce damage taken by 1.

CQC Specialist: Add +2 Accuracy in melee vs INF (Including Charge)

Exploit Weakness: Roll Breaches starting at Tier 3 (Yellow)

Pilot Expertise: When piloting a Coreborn, give it +1 to all Recalibration. This infantry has no penalties to piloting a Coreborn.

Operator		HP: 3	20
Range: 10”	Mv: 4”	Dodge: 0	VET
Vs Infantry 1 x Tier 2 (Green)		Vs Coreborn N/A	

Passives

Jump Packs: can jump up to their movement to land on Coreborn or terrain.

Expert Operator: While piloting a Coreborn, that Coreborn gains +1 Melee, Ranged and Artillery Accuracy.

Escape Plan: if the Coreborn this unit is piloting is destroyed, the Operator is placed in base contact with the Coreborn before removing the unit. The Operator takes no damage from being inside a destroyed Coreborn

Shade		HP: 2	40
Range: 12”	Mv: 8”	Dodge: 1	VET
Vs Infantry 2 x Tier 3 (Yellow)		Vs Coreborn 1 x Tier 2 (Green)	

Passive: Shade Tech: If this infantry does not fire or use an ability and ends its activation in base contact with terrain or in encompassing terrain, it may Cloak, becoming untargetable until its next activation. It can still be hit by **area of effect attacks.** Being hit takes them out of Cloak.

Actives: Surprise Shot: While Cloaked, target an infantry and roll 2 x Tier 6 (Red) die. This cannot be modified.
Satchel Charge: Target a Coreborn within 3″; roll 1 × Tier 3 (Yellow) die (unmodified). On a hit, deal 2 damage and 1 Fire token, then roll a Breach starting at Tier 4 (Purple) This ignores shields.

Shade Special Rules:

Forward Spawn

If the cover a Shade that is using “Shade Tech” is up against is destroyed, they lose stealth

If a Shade moves for any reason they lose stealth

Initiative Cards

1	2	3
4	5	6

Step-by-Step Combat Resolution

1. **Choose Target**: Confirm line of sight.
2. **Declare Fire**: Select weapon and its appropriate damage profile depending on what is being fired at.
3. **Apply Combat Modifiers Below:**
4. **Check for Base Accuracy and Potential Damage:** Check what die color (Base Accuracy) and how many (Potential Damage) dice to roll.
    - Except with Artillery, Melee and Attacks of Opportunity
        - For melee and artillery only **roll 1 die at Base Accuracy no matter how much damage the attack deals.**
        - Attacks of opportunity **roll 1 die** at Tier 3 (Yellow). This cannot be modified.
5. **Apply Accuracy:**
    - **+Accuracy** to each roll which increases the Dice Tier by 1 per 1 Accuracy.
        - *IE: +1 Ranged Accuracy increases the Dice Tier by 1. From Tier 4 (Purple) to Tier 5 (Blue)*
6. **Apply enemy cover and dodge:**
    - **Enemy Cover** decreases the Dice Tier by 1 if the attacker can see between 33% and 66% of the defending model.
        - *IE: a model in cover reduces an enemy Tier 4 (Purple) attack to Tier 3 (Yellow).*
    - **Enemy Dodge** decreases the Dice Tier by 1 per dodge.
        - *IE: a dodge stat of 2 reduces an enemy Tier 4 (Purple) attack to Tier 2 (Green).*
7. **Apply Recalibration:** allows rerolls to dice based on the Recalibration stat.
    - The attacker may reroll a number of dice up to their Recalibration stat.
    - If using Recalibration to reroll, lower the Dice Tier of the rerolled dice by 1.
        - *Example: Ranged Recalibration +3 lets you reroll up to 3 dice but lower all their Dice Tier by 1.*
    - Artillery and Melee Recalibration reroll the one die they roll as many times as they have Recalibration but lower the Dice Tier each time it is rolled.
        - *Example: Melee Recalibration +2 allows the melee die to be rerolled up to 2 times and lowering the Dice Tier each time.*
8. **If rolled a hit or crit: Apply Damage:**
    - **1 damage per hit and 2 damage per crit.**
9. **Situational:** Roll Token dice and apply token(s)
    - **1 token per hit and 2 tokens per crit.**
        - **If firing at an infantry, some tokens may instead add damage.**
10. **If firing at an infantry, stop here:**

---

11. **If Coreborn, roll for breach:** The dice roll depends on what unit is doing the breach.
    - **If rolled a hit or crit** = Breach
        - **+Corebreaker**: Increase the Die Tier.
        - **+Enemy Guard**: Decrease Die Tier.
            1. If the roll was a crit, deal 1 more structure damage to the target.
    - **On Corebreak:**
        - 1st Corebreak: **Remove Secondary Attribute**
        - 2nd Corebreak: **Remove Primary Attribute**
        - 3rd Corebreak: **Unit is Destroyed**

(Ignore for now) Example Shooting and Breach

A Class II Coreborn with a Rotary Autocannon walks and fires at a Class I Coreborn at a range of 8 inches.

The Class II Coreborn will roll 2 Tier 4 (Purple) dice because that is the weapons damage profile against Coreborn.

To find the modified Dice Tier add up the modifiers. Start at Tier 4 (Purple) for base, add +1 Tier because the Class I is within half the Class IIs weapon range (making it Tier 5 (Blue)), then -2 Tier from the Class I dodge stat. (Making it Tier 3 (Yellow))

The Class II will roll 2 dice at Tier 3 (Yellow) each.

The Class II Coreborn rolls 2 Tier 3 (Yellow) dice and rolls a one hit and one miss. One damage is applied to the Class I Coreborn.

The Class II is equipped with a Rotary Autocannon. This weapon has a ranged Recalibration of +2. This allows the Class II to reroll up to 2 dice but lower its Tier. In this case, the Class II rerolls the one die that missed but at a -1 Tier so the Class II rolls a Tier 2 (Green) die. It rolls a Crit!

The Class I Coreborn is dealt 2 damage since both dice hit. The Class I has no Aeonite Shields so both hits go into its structure. The Class II now rolls for a breach.

Example Breach

This die starts at Tier 3 (Yellow) since all die for breaches start at Tier 3 (Yellow).

Class I Coreborns have no inherent Guard.

The Class II Coreborn is equipped with a Rotary Autocannon giving +1 Corebreak

The + 1 Corebreak increases the die to a Tier 4 (Purple) die.

The Class II rolls a single Tier 4 (Purple) die and gets a hit, breaching the armor of the Class I, breaking part of its core, and disabling the minor attribute.
